Motel Of The Mysteries:

Motel of the Mysteries David Macaulay, 1979-10-11 It is the year 4022 all of the ancient country of Usa has been buried under many feet of detritus from a catastrophe that occurred back in 1985 Imagine then the excitement that Howard Carson an amateur archeologist at best experienced when in crossing the perimeter of an abandoned excavation site he felt the ground give way beneath him and found himself at the bottom of a shaft which judging from the DO NOT DISTURB sign hanging from an archaic doorknob was clearly the entrance to a still sealed burial chamber Carson s incredible discoveries including the remains of two bodies one of them on a ceremonial bed facing an altar that appeared to be a means of communicating with the Gods and the other lying in a porcelain sarcophagus in the Inner Chamber permitted him to piece together the whole fabric of that extraordinary civilization

Death-Ritual and Social Structure in Classical Antiquity Ian Morris, 1992-10-22 In this innovative book Dr Morris seeks to show the many ways in which the excavated remains of burials can and should be a major source of evidence for social historians of the ancient Graeco Roman world Burials have a far wider geographical and social range than the surviving literary texts which were mainly written for a small elite They provide us with unique insights into how Greeks and Romans constituted and interpreted their own communities In particular burials enable the historian to study social change Ian Morris illustrates the great potential of the material in these respects with examples drawn from societies as diverse in time space and political context as archaic Rhodes classical Athens early imperial Rome and the last days of the western Roman empire

American Autopia Gabrielle Esperdy, 2019-10-28 Early to mid twentieth century America was the heyday of a car culture that has been called an automobile utopia In American Autopia Gabrielle Esperdy examines how the automobile influenced architectural and urban

discourse in the United States from the earliest days of the auto industry to the aftermath of the 1970s oil crisis Paying particular attention to developments after World War II Esperdy creates a narrative that extends from U S Routes 1 and 66 to the Las Vegas Strip to California freeways with stops at gas stations diners main drags shopping centers and parking lots along the way While it addresses the development of auto oriented landscapes and infrastructures American Autopia is not a conventional history offering instead an exploration of the wide ranging evolution of car centric territories and drive in typologies looking at how they were scrutinized by diverse cultural observers in the middle of the twentieth century Drawing on work published in the popular and professional press and generously illustrated with evocative images the book shows how figures as diverse as designer Victor Gruen geographer Jean Gottmann theorist Denise Scott Brown critic J B Jackson and historian Reyner Banham constructed autopia as a place and an idea The result is an intellectual history and interpretive roadmap to the United States of the Automobile
