If you think they are only flourishes of notes up and down the keyboard, you are really in for a surprise. We'll take a close look at some of the musical magic you can do with these flexible MIDI devices.

This function lets you automatically trigger musical and rhythmic phrases using the current voice by simply pressing a key or keys on the keyboard. The Arpeggio sequence changes in response to the actual notes or chords you play, giving you a wide variety of inspiring musical phrases and ideas, both in composing and performing.

### Documents Enclosed

It is important to understand what an arpeggio is capable of doing and not doing. As implemented on the Yamaha synthesizers, the arpeggio is a tool that has purposefully been left "open" as to how you can utilize it. Instead of making a long list of rules, the arpeggio creation process is open for interpretation and experimentation. The actual restrictions are really very few - but very important to grasp - particular when it comes to data you input or select to use as an arpeggio. Arpeggios are often flourishes of notes or they can be controller gestures (movements), but whatever they are, first and foremost, they're MIDI events that can be controlled in a unique/interactive way. That said, they are all created using the MIDI Sequencer. So you have to be able to play, perform or enter it in to the sequencer, at least once, in order to be able to convert it into an arp. Any MIDI data from a song file, that meets the requirements, can be converted into an arpeggio, as well. We will take a look at how the rules were designed to work, then we will look at how we can bend those rules. If you do not know the rules, they quickly become limitations rather than assets.
