preview of the product being sold Although it is a subject of recent technological origin the art of packaging is as old as the primitive humans Packaging is the science art and technology of enclosing or protecting products for distribution storage sale and use also refers to the process of design evaluation and production of packages and can be described as a coordinated system of preparing goods for transport warehousing logistics sale and end use Packaging contains protects preserves transports informs and sells In many countries it is fully integrated into government business institutional industrial and personal use The continual technological growth systems have undergone significant changes in recent years A lot of packaging process has been streamlined to give a more scientific and rational approach The role of packaging continues from the coordinated system of preparing goods to the end use It has become a big tool for launching new specific products in different shapes and sizes The packaging industrial growth has led to greater specialization and sophistication from the point of view of health in the case of packaged foods and medicines and environment friendliness of packing material The demands on the packaging industry are challenging given the increasing environmental awareness among communities The packaging industry is growing at the rate of 22 to 25 per cent per annum thus is to play a unique role in preserving the wealth or value created by many industries This book describes the techniques and process behind packaging of different specific products which are used in our day to day life The specific products include cereal spices edible oils drinking water chocolate and confectionery fruits and vegetables marine products and many more Some of the vital contents of the book are adhesives for packaging industries factors affecting adhesion tin plate containers for foods pharmaceuticals and cosmetics tin plate usage in packaging packaging of cereals and cereal products trends in packaging of spices and spice products packaging of edible oils vanaspathi and ghee metal containers for food packaging packaging aspects of sugar and chocolate confectionery packaging for irradiated foods packing of meat meat products in tin containers etc This book is an invaluable resource for all its readers entrepreneurs scientists existing industries technical institution etc in the field of packaging

The Reinforced Plastics Handbook J. Murphy, 2013-10-22 The Handbook of Reinforced Plastics is a complete and practical manual for specifying and selecting reinforced plastic products and services The handbook covers all materials and classes of equipment currently available with over 550 pages of editorial illustrations and tables The Packaging User's Handbook Frank A. Paine, 2012-12-06 The first version of this book Packaging Materials and Containers was published in 1967 and was revised extensively ten years later under the title The Packaging Media Some thirty or so authors were involved in producing the initial texts for these books and I must acknowledge their material much of which is still valid It is now thirteen years since The Packaging Media high time to take stock and incorporate the considerable advances in materials forms techniques and machinery that have taken place In 1977 wherever possible we asked the original authors to carry out the revisions but retirements and job changes have now eliminated over twenty of the original authors We have therefore appointed an Editorial Board to advise on this more extensive revision and I wish to thank them

for their detailed and helpful assistance Dr C J Mackson and Professor Y Dagel for general comments and guidance on the overall plan and in particular the Introduction chapter 1 Graham Gordon and Harri Mostyn for assistance with much of Part D on Distribution Packages and Dennis Hine and Susan Selke for their work in respect of paperboard and plastics retail packaging respectively A major contribution was made by the seventh member of the Editorial Board David Osborne who advised in the area of glass
