Multiple Case Study Analysis:

Multiple Case Study Analysis Robert E. Stake, 2013-04-29 Examining situational complexity is a vital part of social and behavioral science research This engaging text provides an effective process for studying multiple cases such as sets of teachers staff development sessions or clinics operating in different locations within one complex program The process also can be used to investigate broadly occurring phenomena without programmatic links such as leadership or sibling rivalry Readers learn to design analyze and report studies that balance common issues across the group of cases with the unique features and context of each case Three actual case reports from a transnational early childhood program illustrate the author's approach and helpful reproducible worksheets facilitate multicase recording and analysis Case Study Research Robert K. Yin, 2003 With over 90 000 copies sold of the previous editions the new Third Edition of the best selling Case Study Research has been carefully revised updated and expanded while retaining virtually all of the features and coverage of the second edition Robert Yin's comprehensive presentation covers all aspects of the case study method from problem definition design and data collection to data analysis and composition and reporting Yin also traces the uses and importance of case studies to a wide range of disciplines from sociology psychology and history to management planning social work and education New to the Third Edition are additional examples of case study research discussions of developments in related methods including randomized field trials and computer assisted coding techniques added coverage of the strengths of multiple case studies case study screening and the case study as a part of larger multi method studies and five major analytic techniques including the use of logic models to guide analysis This edition also includes references to examples of actual case studies in the companion volume Applications of Case Study Research Second Edition Sage 2003 **Managing complex multi-case study evaluations** Heather L. Kane, Laurie W. Hinnant, Amy E. Roussel, Janice P. Tzeng, Mary Council, 2014-12-16 Between 2010 and 2012 as part of the Communities Putting Prevention to Work CPPW initiative the Centers for Disease Control and Prevention CDC funded 50 states six US territories and 50 communities to support high impact evidence based population wide strategies to create healthy environments for their residents CPPW is a locally driven initiative with a primary focus on prevention and control of tobacco use and obesity As part of this initiative CDC also funded an implementation evaluation to describe and understand how evidence based community level improvements are applied in the field and contribute to improvements in health We conducted this evaluation using multi case study methods that best captured the local context and implementation processes Large cross case evaluations present challenges that single or small multi case evaluations do not These challenges include creating flexible but standard data collection instruments ensuring the feasibility and utility of instruments and processes through pilot testing promoting consistent data collection and quality and managing a large qualitative data set and coding team In this report we document some strategies regarding data collection management and analysis that should be beneficial to other organizations supporting public health initiatives and

to investigators in designing the strongest possible evaluations using large multi case design
