is an understanding of the contingent nature of museum ethics in the twenty first century its relations with complex economic social political and technological forces and its fluid ever shifting sensibility The volume examines contemporary museum ethics through the prism of those disciplines and methods that have shaped it most It argues for a museum ethics discourse defined by social responsibility radical transparency and shared guardianship of heritage And it demonstrates the moral agency of museums the concept that museum ethics is more than the personal and professional ethics of individuals and concerns the capacity of institutions to generate self reflective and activist practice *Museum Object Lessons for the Digital Age* Haidy Geismar,2018-05-14 Museum Object Lessons for the Digital Age explores the nature of digital objects in museums asking us to question our assumptions about the material social and political foundations of digital practices Through four wide ranging chapters each focused on a single object a box pen effigy and cloak this short accessible book explores the legacies of earlier museum practices of collection older forms of media from dioramas to photography and theories of how knowledge is produced in museums on a wide range of digital projects Swooping from Ethnographic to Decorative Arts Collections from the Google Art Project to bespoke digital experiments Haidy Geismar explores the object lessons contained in digital form and asks what they can tell us about both the past and the future Drawing on the author s extensive experience working with collections across the world Geismar argues for an understanding of digital media as material rather than immaterial and advocates for a more nuanced ethnographic and historicised view of museum digitisation projects than those usually adopted in the celebratory accounts of new media in museums By locating the digital as part of a longer history of material engagements transformations and processes of translation this book broadens our understanding of the reality effects that digital technologies create and of how digital media can be mobilised in different parts of the world to very different effects     Handbook of Research on Examining Cultural Policies Through Digital Communication Önay Dogan, Betül,Gül Ünlü, Derya,2018-11-09 Culture is one of the most important elements for explaining individuals behaviors within the social structure It meets the various social needs of members of a society by directing how individuals must react to various events and how to act in specific circumstances A planned and systematic process is required for disseminating this cultural accumulation as a policy which is produced collectively by all members within their everyday life practices The Handbook of Research on Examining Cultural Policies Through Digital Communication provides emerging research on this aspect of cultural policy which is formed within the framework of this systematic process in a strategic manner and can be defined as various activities of the state intended for art human sciences and cultural inheritance Creating such cultural policies involves the establishment of measures and organizations required for the development of each individual providing economic and social facilities all of which are actions intended for directing society Featuring coverage on a broad range of topics such as long distance education digital citizenship and public diplomacy this book is ideally designed for academicians researchers advanced level students sociologists international and national organizations and government officials     The

**Engaging Heritage, Engaging Communities** Bryony Onciul,Michelle L. Stefano,Stephanie Hawke,2017 International multi disciplinary perspectives on the key question of community engagement in theory and practice in a diverse range of heritage settings Across the global networks of heritage sites museums and galleries the importance of communities to the interpretation and conservation of heritage is increasingly being recognised Yet the very term meaningful community engagement betrays a myriad of contrary approaches and understandings Who is a community How can they engage with heritage and why would they want to How do communities and heritage professionals perceive one another What does itmean to engage These questions unsettle the very foundations of community engagement and indicate a need to unpick this important but complex trend Engaging Heritage Engaging Communities critically explores the latest debates and practices surrounding community collaboration By examining the different ways in which communities participate in heritage projects the book questions the benefits costs and limitations of community engagement Whether communities are engaging through innovative initiatives or in response to economic political or social factors there is a need to understand how such engagements are conceptualised facilitated and experienced by boththe organisations and the communities involved Bryony Onciul is Lecturer in History at the University of Exeter Michelle Stefano is the Co Director of Maryland Traditions the folklife program for the state of Maryland and Visiting Assistant Professor in American Studies at the University of Maryland Baltimore County Stephanie Hawke is a project manager and fundraiser working on a range of projects aiming to engage communities with culturalheritage Contributors Gregory Ashworth Evita Busa Helen Graham Julian Hartley Stephanie Hawke Carl Hogsden Shatha Abu Khafajah Nicole King Bernadette Lynch Billie Lythberg Conal McCarthy Ashley Minner Wayne Ngata Bryony Onciul Elizabeth Pishief Gregory Ramshaw Philipp Schorch Justin Sikora Michelle Stefano Helen Tully John Tunbridge Digital History and Hermeneutics Andreas Fickers,Juliane Tatarinov,2022-06-21 As a result of rapid advancements in computer science during recent decades there has been an increased use of digital tools methodologies and sources in the field of digital humanities While opening up new opportunities for scholarship many digital methods and tools now used for humanities research have nevertheless been developed by computer or data sciences and thus require a critical understanding of their mode of operation and functionality The novel field of digital hermeneutics is meant to provide such a critical and reflexive frame for digital humanities research by acquiring digital literacy and skills A new knowledge for the assessment of digital data research infrastructures analytical tools and interpretative methods is needed providing the

humanities scholar with the necessary munition for doing critical research The Doctoral Training Unit Digital History and Hermeneutics at the University of Luxembourg applies this analytical frame to 13 PhD projects By combining a hermeneutic reflection on the new digital practices of humanities scholarship with hands on experimentation with digital tools and methods new approaches and opportunities as well as limitations and flaws can be addressed     *Human-Computer Interaction.
