Musical Gestures Sound Movement And Meaning:

Musical Gestures Rolf Inge Godøy, Marc Leman, 2010-02-12 Musical Gestures is a collection of essays that explore the relationship between sound and movement The book takes an interdisciplinary approach to the fundamental issues of this subject drawing on ideas theories and methods from disciplines such as musicology music perception and human movement science

The Routledge Companion to Embodied Music Interaction Micheline Lesaffre, Pieter-Jan Maes, Marc Leman, 2017-09-19 The Routledge Companion to Embodied Music Interaction captures a new paradigm in the study of music interaction as a wave of recent research focuses on the role of the human body in musical experiences This volume brings together a broad collection of work that explores all aspects of this new approach to understanding how we interact with music addressing the issues that have roused the curiosities of scientists for ages to understand the complex and multi faceted way in which music manifests itself not just as sound but also as a variety of cultural styles not just as experience but also as awareness of that experience With contributions from an interdisciplinary and international array of scholars including both empirical and theoretical perspectives the Companion explores an equally impressive array of topics including Dynamical music interaction theories and concepts Expressive gestural interaction Social music interaction Sociological and anthropological approaches Empowering health and well being Modeling music interaction Music based interaction technologies and applications This book is a vital resource for anyone seeking to understand human interaction with music from an embodied perspective

The Expressive Moment Marc Leman, 2023-12-26 A new way to understand expressive interaction focusing on the dynamic fast pre reflective processes underlying interactions with music The expressive moment is that point in time when we grasp a situation and respond quickly even before we are aware of it In this book Marc Leman argues that expression drives this kind of interaction and he proposes a general framework for understanding expressive interactions He focuses on the dynamic fast and pre reflective processes underlying our interactions with music whether we are playing an instrument dancing listening or using new interactive technologies Music offers a well established domain for studying these fast and interactive processes and Leman argues that understanding the power of expressive interaction through music may help us understand cognitive processing in other domains including language human action coordination human animal interaction and human machine interaction Leman regards expressive interactions with music as energizing and empowering He argues that music is based on patterns that intervene with a reinforcing loop in the human brain strengthening learning motivation and reward He argues further that the reinforcing effect is influenced by the interaction flow by fast processes that handle expressive qualities on the fly Leman sets out the framework in which expressive interaction is situated describing among other things a pragmatic model of communication in which the fundamental components are enactment and dynamics He looks in more detail at the cognitive motivational architecture discussing sensorimotor and motivational schemes Finally he discusses applications for the concepts behind expressive motivation in

Experience Music Experiment William Brooks, 2021-08-19 Truth happens to an idea So wrote William James in 1907 and twenty four years later John Dewey argued that artistic experience entailed a process of doing and undergoing But what do these ideas have to do with music or with research conducted in and through music that is with artistic research In this collection of essays fourteen very different authors respond with distinct and challenging perspectives Some report on their own experiments and experiences some offer probing analyses of noteworthy practices some view historical continuities through the lens of pragmatism and artistic experiment The resulting collection yields new insights into what musicians do how they experiment and what they experience insights that arise not from doctrine but from diverse voices seeking common ground in and through experimental discourse artistic research in and of itself

Vienna's summer school has turned out successfully both in terms of its international resonance and its effects on the institution's academic community. Therefore, the event's program chairs have decided to publish a selection of what has been discussed and presented so far, demonstrating the considerable diversity of disciplines, approaches, and topics.

Enacting Musical Time Mariusz Kozak, 2020 A compelling approach among works on temporality, phenomenology, and the ecologies of the new sound worlds. *Enacting Musical Time* argues that musical time is itself the site of the interaction between musical sounds and a situated embodied listener created by the moving bodies of participants engaged in musical activities.

Sonic Design Alexander Refsum Jensenius, 2024-05-09 This open access book offers a historical context and an overview of the field's current artistic and scientific research. Sonic design includes the construction and performance of acoustic instruments but also recording, editing, mixing, and synthesizing sounds using analog and digital electronic devices. This book explores sonic design from the perspectives of music theory, music perception, embodied cognition, phenomenology, soundscape studies, acoustics, new interfaces for musical expression, sound and music computing, and music information retrieval. The chapters are selected contributions from an international seminar organized to celebrate the achievements of Professor Rolf Inge Godøy at the University of Oslo. As a composer, researcher, teacher, and supervisor, Professor Godøy has been central in developing a holistic approach to sonic design from theory to practice. This book offers a comprehensive overview of the field's current state, making it essential reading for students, practitioners, and researchers across a wide range of disciplines.

Musical Robots and Interactive Multimodal Systems Jorge Solis, Kia Ng, 2011-07-25 Musical robotics is a multi- and trans-disciplinary research area involving a wide range of different domains that contribute to its development, including computer science, multimodal interfaces, and processing, artificial intelligence, electronics, robotics, mechatronics, and more. A musical robot requires many different complex systems to work together, integrating musical representation techniques, expressions, detailed analysis, and controls for both playing and listening. The development of interactive multimodal systems provides advancements which enable enhanced human-machine interaction and novel possibilities for embodied robotic platforms. This volume is focused on this highly exciting interdisciplinary field. This book consists of 14 chapters highlighting different aspects of musical activities and interactions, discussing cutting-edge research related to interactive multimodal systems and their integration with robots to further enhance musical understanding, interpretation, performance, education, and enjoyment. It is dichotomized into two sections. Section I focuses on understanding elements of musical performance and expression, while Section II concentrates on musical robots and automated instruments. *Musical Robots and Interactive Multimodal Systems* provides an introduction and foundation for researchers, students, and practitioners to key achievements and current research trends on interactive multimodal systems and musical robotics.
