Musical Creativity In Restoration England:

Musical Creativity in Restoration England Rebecca Herissone, 2013-10-10 Rebecca Herissone's study is the first comprehensive investigation of approaches to creating music in late seventeenth century England. Her methodology challenges pre-conceptions about what it meant to be a composer in the period and goes on to raise broader questions about the interpretation of early modern notation.

Musical Creativity in Restoration England Rebecca Herissone, 2013. *Musical Creativity in Restoration England* is the first comprehensive investigation of approaches to creating music in late seventeenth century England. Understanding creativity during this period is particularly challenging because many of our basic assumptions about composition such as concepts of originality, inspiration and genius were not yet fully developed. In adopting a new methodology that takes into account the historical contexts in which sources were produced, Rebecca Herissone challenges current assumptions about compositional processes and offers new interpretations of the relationships between notation, performance, improvisation and musical memory. She uncovers a creative culture that was predominantly communal and reveals several distinct approaches to composition determined not by individuals but by the practical function of the music. Herissone's new and original interpretations pose a fundamental challenge to our preconceptions about what it meant to be a composer in the seventeenth century and raise broader questions about the interpretation of early modern notation.

Concepts of Creativity in Seventeenth-century England Rebecca Herissone, Alan Howard, 2013. The first genuinely interdisciplinary study of creativity in early modern England. In the seventeenth century the concept of creativity was far removed from most of the fundamental ideas about the creative act: notions of human imagination, inspiration, originality and genius that developed in the eighteenth and nineteenth centuries. Instead, in this period, students learned their crafts by copying and imitating past masters and did not consciously seek to break away from tradition. Most new material was made on the instructions of a patron and had to conform to external expectations and basic tenets that we tend to take for granted such as the primacy and individuality of the author were apparently considered irrelevant in some contexts. The aim of this interdisciplinary collection of essays is to explore what it meant to create buildings and works of art, music and literature in seventeenth century England and to investigate the processes by which such creations came into existence. Through a series of specific case studies, the book highlights a wide range of ideas, beliefs and approaches to creativity that existed in seventeenth century England and places them in the context of the prevailing intellectual, social and cultural trends of the period. In so doing, it draws into focus the profound changes that were emerging in the understanding of human creativity in early modern society, transformations that would eventually lead to the development of a more recognisably modern conception of the notion of creativity. The contributors work in and across the fields of literary studies, history, musicology, history of art and history of architecture and their work collectively explores many of the most fundamental questions about creativity posed by the early modern English creative arts.

Music, Dance, and Drama in Early

Modern English Schools Amanda Eubanks Winkler, 2020-06-04 Music Dance and Drama in Early Modern English Schools is the first book to systematically analyze the role that the performing arts played in English schools after the Reformation. Although the material record is riddled with gaps, Amanda Eubanks Winkler sheds light on the subject through an innovative methodology that combines rigorous archival research with phenomenological and performance studies approaches. She organizes her study around a series of performance-based questions that demonstrate how the schoolroom intersected with the church, the court, the domicile, the concert room, and the professional theater, which allows her to provide fresh perspectives on well-known canonical operas performed by children, as well as lesser-known works. Eubanks Winkler also interrogates the notion that performance is ephemeral, as she considers how scores and playtexts serve as a conduit between past and present, and demonstrates the ways in which pedagogical performance is passed down through embodied praxis.

Knowledge Building in Early Modern English Music Katie Bank, 2020-08-16 Knowledge Building in Early Modern English Music is a rich interdisciplinary investigation into the role of music and musical culture in the development of metaphysical thought in late sixteenth-early seventeenth-century England. The book considers how music presented questions about the relationships between the mind, body, passions, and the soul, drawing out examples of domestic music that explicitly address topics of human consciousness such as dreams, love, and sensing. Early seventeenth-century metaphysical thought is said to have paved the way for the Enlightenment. Self-Yet studies of the music's role in natural philosophy have been primarily limited to symbolic functions in philosophical treatises, virtually ignoring music-making's substantial contribution to this watershed period. Contrary to prevailing narratives, the author shows why music-making did not only reflect impending change in philosophical thought but contributed to its formation. The book demonstrates how recreational song, such as the English madrigal, confronted assumptions about reality and representation and the role of dialogue in cultural production and other ideas linked to changes in how knowledge was built. Focusing on music by John Dowland, Martin Peerson, Thomas Weelkes, and William Byrd, this study revises historiography by reflecting on the experience of music and how music contributed to the way early modern awareness was shaped.

Before the Baton Peter Holman, 2020 This book investigates the ways large-scale music was directed or conducted in Britain before baton conducting took hold in the 1830s. After surveying practice in Italy, Germany, and France from antiquity to the eighteenth century, the focus is on direction in two strands of music-making in Stuart and Georgian Britain: choral music from Restoration cathedrals to the oratorio tradition deriving from Handel, and music in the theatre from the Jacobean masque to nineteenth-century opera, ending with an account of how modern baton conducting spread in the 1830s from the pit of the Haymarket Theatre to the Philharmonic Society and to large-scale choral music. Part social and musical history based on new research into surviving performing material, documentary sources, and visual evidence, and part polemic intended to question the use of modern baton conducting in pre-nineteenth-century music. *Before the Baton* throws new light on many hitherto dark areas, though the heart of the book is an extended discussion of the

evidence relating to Handel's operas, oratorios and choral music. Contrary to near universal modern practice he mostly preferred to play rather than beat time. PETER HOLMAN is Emeritus Professor of Historical Musicology at Leeds University. When not occupied with writing and research he organises performances of seventeenth and eighteenth century music mostly directing them from the keyboard. He is director of The Parley of Instruments, Leeds Baroque, the Suffolk Villages Festival and the annual Baroque Summer School run by Cambridge Early Music. *Beyond Boundaries* Linda Phyllis Austern, Candace Bailey, Amanda Eubanks Winkler, 2017-02-13 English music studies often apply rigid classifications to musical materials, their uses, their consumers and performers. The contributors to this volume argue that some performers and manuscripts from the early modern era defy conventional categorization as amateur or professional, native or foreign. These leading scholars explore the circulation of music and performers in early modern England, reconsidering previously held ideas about the boundaries between locations of musical performance and practice. *Music, Religion and Politics at Worcester Cathedral, 680-1950* Richard Newsholme, 2025-03-17 This book provides a comprehensive history of music and liturgy at Worcester Cathedral from its foundation in the seventh century to the mid 20th century. The author delves into how political shifts, public opinion and national trends have influenced changes in the cathedral's practices over time, while also highlighting the distinct local dynamics at play. The book captures the fluctuating significance of liturgy and music across different eras, from the strict ritualistic practices of Benedictine monks to the rejection of ceremonial traditions by Interregnum Non Conformists. It traces how the form of worship evolved in response to the beliefs of church leaders, leading to periods of decline and revival in the cathedral's musical standards. Notably, the study explores Worcester's role in the development of British polyphony up to the 14th century and the comforting role of the choir during World War I. With a wealth of surviving Anglo-Saxon charters, medieval liturgical manuscripts and unique polyphonic fragments, this volume offers rare insights into centuries-old practices. While it focuses on Worcester, the study reflects broader trends in English cathedral history, providing a vital resource for understanding the interplay of music, religion and politics in the evolution of worship.
