When You Finally Get Serious

GETTING STARTED
 Before you begin your workout, it is important to warm up your muscles. This can be done by performing light cardio for 5-10 minutes. Once you are warmed up, you can begin your workout. Start with a few sets of each exercise, and then increase the weight or reps as you become more comfortable. Remember to breathe properly and maintain good form throughout your workout.

IMPORTANT SAFETY INFORMATION
 Always use proper form and technique when performing exercises. If you are unsure of how to perform an exercise, consult a fitness professional. Do not lift weights that are too heavy for you, and avoid lifting with your back. If you experience any pain or discomfort during your workout, stop immediately and consult a doctor.
