**Marxism and National Identity** Robert Stuart, 2006-06-01 Post Marxists argue that nationalism is the black hole into which Marxism has collapsed at today s end of history Robert Stuart analyzes the origins of this implosion revealing a shattering collision between Marxist socialism and national identity in France at the close of the nineteenth century During the time of the Boulanger crisis and the Dreyfus affair nationalist mobs roamed the streets chanting France for the French while socialist militants marshaled proletarians for world revolution This is the first study to focus on those militants as they struggled to reconcile Marxism s two national agendas the cosmopolitan conviction that workingmen have no country on the one hand and the patriotic assumption that the working class alone represents national authenticity on the other Anti Semitism posed a particular problem for such socialists not least because so many workers had succumbed to racist temptation In analyzing the resultant encounter between France s anti Semites and the Marxist Left Stuart addresses the vexed issue of Marxism s involvement with political anti Semitism [Terrorism in Perspective](#) Sue Mahan, Pamala L.

Griset, 2012-11-21 The Third Edition of *Terrorism in Perspective* like its two successful predecessors takes a broad based approach that emphasizes the historical cultural political religious social and economic factors that underlie an understanding of both global and domestic terrorism This unique text reader combines original essays with the best of the existing literature on terrorism Each chapter of this text begins with an overview essay written by the authors followed by two relevant and engaging articles culled from a wide variety of popular academic and governmental sources This is the only major terrorism text to incorporate readings from top terrorism experts into a traditional textbook format allowing readers to deepen their understanding of each aspect of terrorism **Academic Life and Labour in the New University** Ruth

Barcan, 2016-03-23 What does it mean to be an academic today What kinds of experiences do students have and how are they

affected by what they learn Why do so many students and their teachers feel like frauds Can we learn to teach and research in ways that foster hope and deflate pretension Academic Life and Labour in the New University Hope and Other Choices addresses these big questions discussing the challenges of teaching and researching in the contemporary university the purpose of research and its fundamental value and the role of the academy against the background of major changes to nature of the university itself Drawing on a range of international media sources political discourse and many years professional experience this volume explores approaches to teaching and research with special emphasis on the importance of collegiality intellectual honesty and courage With attention to the intersection of large scale institutional changes and intellectual shifts such as the rise of transdisciplinarity and the development of a pluralist curriculum this book proposes the pursuit of more ethical compassionate and critical forms of teaching and research As such it will be of interest not only to scholars of cultural studies and education but to all those who care about the fate of the university as an institution including young scholars seeking to join the academy

**Reporting Genocide** David Patrick, 2017-12-13 The Western world's responses to genocide have been slow unwieldy and sometimes unfit for purpose So argues David Patrick in this essential new contribution to the aid and intervention debate While the UK and US have historically been committed to the ideals of human rights freedom and equality their actual material reactions are more usually dictated by geopolitical noise pre conceived ideas of worth and the media attention spans of individual elected leaders Utilizing a wide ranging quantitative analysis of media reporting across the globe Patrick argues that an over reliance on the Holocaust as the framing device we use to try and come to terms with such horrors can lead to slow responses misinterpretation and category errors in both Rwanda and Bosnia much energy was expended trying to ascertain whether these regions qualified for genocide status The Reporting of Genocide demonstrates how such tragedies are reduced to stereotypes in the media framed in terms of innocent victims and brutal oppressors which can over simplify the situation on the ground This in turn can lead to mixed and inadequate responses from governments Reporting on Genocide also seeks to address how responses to genocides across the globe can be improved and will be essential reading for policy makers and for scholars of genocide and the media

**Understanding Media Cultures** Nick Stevenson, 2002-04-02 The Second Edition of this book provides a comprehensive overview of the ways in which social theory has attempted to theorize the importance of the media in contemporary society Understanding Media Cultures is now fully revised and takes account of the recent theoretical developments associated with New Media and Information Society as well as the audience and the public sphere *American Book Publishing Record* ,2005
