A Theory of Legal Punishment Matthew Altman, 2021-05-05 This book argues for a mixed theory of legal punishment that treats both crime reduction and retribution as important aims of the state A central question in the philosophy of law is why the state's punishment of its own citizens is justified Traditionally two theories of punishment have dominated the field consequentialism and retributivism According to consequentialism punishment is justified when it maximizes positive outcomes According to retributivism criminals should be punished because they deserve it This book recognizes the strength of both positions According to the two tiered model the institution of punishment and statutory penalties as set by the legislature are justified based on their costs and benefits in terms of deterrence and rehabilitation The law exists to preserve the public order Criminal courts by contrast determine who is punished and how much based on what offenders deserve The courts express the community's collective sense of resentment at being wronged This book supports

the two tiered model by showing that it accords with our moral intuitions commonly held compatibilist theories of freedom and assumptions about how the extent of our knowledge affects our obligations It engages classic and contemporary work in the philosophy of law and explains the theory s advantages over competing approaches from retributivists and other mixed theorists The book also defends consequentialism against a longstanding objection that the social sciences give us little guidance regarding which policies to adopt Drawing on recent criminological research the two tiered model can help us to address some of our most pressing social issues including the death penalty drug policy and mass incarceration This book will be of interest to philosophers legal scholars policymakers and social scientists especially criminologists economists and political scientists

Act and Omission in Criminal Law Roni Rosenberg,2024-08-30 This book offers an innovative perspective on the critical distinction between acts and omissions in criminal law a distinction that runs like a defining thread through all types of criminal offenses While any act that positively causes a prohibited harm is sufficient for a conviction an omission that causes the very same harm warrants a conviction only when there is a legal duty to act This fundamental distinction between acts and omissions is not just relevant to criminal law but it is also deeply rooted in our moral thinking Thus it is commonly argued that the difference between acts and omissions is also applicable to the intuitive moral distinction between active euthanasia forbidden in most countries and passive euthanasia permitted in many countries under certain circumstances Hence the significance of this book is threefold First it offers a comprehensive coherent and systematic discussion of the

intersections between the philosophical moral and the legal criminal aspects of this fundamental topic Second it offers a novel rationale for the distinction between acts and omissions based on the principle of autonomy Finally it demonstrates the influences of the theoretical discussion on the most significant practical questions This book will be of interest to researchers academics and policy makers working in the areas of criminal law moral philosophy and bioethics **The Oxford Textbook on Criminology** Stephen Case, Steve Case, David Manlow, Philip Johnson, Kate Williams, Roger Smith, 2021 The Oxford Textbook on Criminology has been developed by a team of experts to equip you with the knowledge confidence skills and enthusiasm you need to achieve your full potential as a criminologist Back cover **The Ethical Legitimization of Criminal Law** Krzysztof Szczucki, 2022-05-09 When creating the norms of criminal law the legislator should strive for their compatibility with the principle of human dignity while taking into account the ethical legitimacy of criminal law This thesis is the axis around which The Ethical Legitimization of Criminal Law is constructed Szczucki shows that criminal law is like a suit to be a perfect fit it has to be tailor made That is why he argues for three points of reference to guide moral evaluation of criminal law first the coherence of the legal system second the will of the legislator and third the virtues of citizens Only by analyzing these concepts together in the context of legal culture can one answer the question of what makes good criminal law The book concludes that an ethical perspective in analyzing grounding and evaluating criminal law is inevitable Appealing to researchers scholars and professionals from across the criminal and legal spectrum this book explores fundamental questions about the nature of ethical perspective in legal analysis **Coercion** Michael R. Rhodes, 2000 In this book Rhodes provides a nonevaluative account of coercion He begins with a thorough discussion of the charge that coercion is an essentially contested concept He argues that effective communication of regulations pertaining to human conduct requires a basic level of clarity as to the kind of conduct being regulated Accordingly he argues that before we prescribe or proscribe conduct we should describe it In short he maintains that wherever possible description should precede prescription and proscription Rhodes begins his descriptive project by providing a fundamental account of human motivation Upon this foundation he supports his distinctions between threats offers threats and neutral proposals He argues that all coercion claims can be understood in light of these components He applies this analysis to three prominent accounts of coercion as advanced by F A Hayek Harry Frankfurt and Robert Nozick After comparing and contrasting these views Rhodes provides his own account Rhodes's account is based upon the identification of what he refers to as perceived threat avoidance behavior as a necessary condition for coercion As a descriptive or nonevaluative account Rhodes is able to identify coercion independent from normative judgments He argues that it is not the wrongfulness of some conduct that makes it coercion instead it is the coerciveness of some conduct that makes it wrong Unique to Rhodes's account coercion is not necessarily wrong As a descriptive account his view permits an independent analysis of the moral status of an act of coercion The book concludes with a discussion of the normatively significant variables of a coercion claim **EBOOK: A Sociology of Mental Health**
