New-product Forecasting Yoram Wind,Vijay Mahajan,Richard N. Cardozo,1981 **New Product Forecasting** Kenneth B. Kahn,2014-12-18 Concise and jargon free this is a one step primer on the tools and techniques of forecasting new product development Equally useful for students and professionals the book is generously illustrated and features numerous current real world industry cases and examples Part I covers the basic foundations and processes of new product forecasting and links forecasting to the broader processes of new product development and sales and operations planning Part II includes detailed step by step techniques of new product forecasting from judgmental techniques to regression analysis Each chapter in this section begins with the most basic techniques then progresses to more advanced levels Part III addresses managerial considerations of new product forecasting including postlaunch issues such as cannibalization and supercession The final chapter presents an important set of industry best practices and benchmarks Intelligent Fashion Forecasting Systems: Models and Applications Tsan-Ming Choi,Chi-Leung Hui,Yong Yu,2013-11-29 Forecasting is a crucial function for companies in the fashion industry but for many real life forecasting applications in the the data patterns are notorious for being highly volatile and it is very difficult if not impossible to analytically learn about the underlying patterns As a result many traditional methods such as pure statistical models will fail to make a sound prediction Over the past decade advances in artificial intelligence and computing technologies have provided an alternative way of generating precise and accurate forecasting results for fashion businesses Despite being an important and timely topic there is currently an absence of a comprehensive reference source that provides up to date theoretical and applied research findings on the subject of intelligent fashion forecasting systems This three part handbook fulfills this need and covers materials ranging from introductory studies and technical reviews theoretical modeling research to intelligent fashion forecasting applications and analysis This book is suitable for academic researchers graduate students senior undergraduate students and practitioners who are interested in the latest research on fashion forecasting **New-Product Diffusion Models** Vijay Mahajan,Eitan Muller,Yoram Wind,2000-09-30 Product sales especially for new products are influenced by many factors These factors are both internal and external to the selling organization and are both controllable and uncontrollable Due to the enormous complexity of such factors it is not surprising that product failure rates are relatively high Indeed new product failure rates have variously been reported as between 40 and 90 percent Despite this multitude of factors marketing researchers have not been deterred from developing and designing techniques to predict or explain the levels of new product sales over time The proliferation of the internet the necessity or developing a road map to plan the launch and exit times of various generations of a product and the shortening of product life cycles are challenging firms to investigate market penetration or innovation diffusion models These models not only provide information on new product sales over time but also provide insight on the speed with which a new product is being accepted by various buying groups such as those identified as innovators early

adopters early majority late majority and laggards New Product Diffusion Models aims to distill synthesize and integrate the best thinking that is currently available on the theory and practice of new product diffusion models This state of the art assessment includes contributions by individuals who have been at the forefront of developing and applying these models in industry The book s twelve chapters are written by a combined total of thirty two experts who together represent twenty five different universities and other organizations in Australia Europe Hong Kong Israel and the United States The book will be useful for researchers and students in marketing and technological forecasting as well as those in other allied disciplines who study relevant aspects of innovation diffusion Practitioners in high tech and consumer durable industries should also gain new insights from New Product Diffusion Models The book is divided into five parts I Overview II Strategic Global and Digital Environments for Diffusion Analysis III Diffusion Models IV Estimation and V Applications and Software The final section includes a PC based software program developed by Gary L Lilien and Arvind Rangaswamy 1998 to implement the Bass diffusion model A case on high definition television is included to illustrate the various features of the software A free 15 day trial access period for the updated software can be downloaded from <http://www.mktgeng.com/diffusionbook> Among the book s many highlights are chapters addressing the implications posed by the internet globalization and production policies upon diffusion of new products and technologies in the population

Market New Products Successfully Kevin J. Clancy, Peter C. Krieg, Marianne McGarry Wolf, 2006-02-02 Innovation remains an arduous and painful process for many companies doing untold damage to brands profitability and careers Some have used line extensions to mitigate risk but all too often they have ended up extending the core brand into oblivion Others have used test markets to help gauge opinion before a national rollout only to have competitors snatch ideas and undermine results Given the problems with conventional approaches it s not surprising that 90% of new products and services fail *Market New Products Successfully* is the definitive guidebook for using simulated test marketing STM a technology that can help companies dramatically improve the odds of introducing a successful new product or service The book examines why STM is important what the differences are between the major systems how to do a simulation and what insights it offers a marketing plan It is the ultimate guidebook for any smart marketer looking to improve the financial outcome of the innovation process

Management Forecasting Kenneth D. Lawrence, Ronald K. Klimberg, 2009-05-08 Presents studies in the application of forecasting methodologies to such areas as sales marketing and strategic decision making This title covers such topics as sales and marketing forecasting new product forecasting judgmentally based forecasting the application of surveys to forecasting and forecasting for strategic business decisions **Building Models for Marketing Decisions** Peter S.H.

Leeftang, Dick R. Wittink, Michel Wedel, Philippe A. Naert, 2013-06-29 This book is about marketing models and the process of model building Our primary focus is on models that can be used by managers to support marketing decisions It has long been known that simple models usually outperform judgments in predicting outcomes in a wide variety of contexts For example models of judgments tend to provide better forecasts of the outcomes than the judgments themselves because the model eliminates the noise in judgments And since judgments never fully reflect the complexities of the many forces that influence outcomes it is easy to see why models of actual outcomes should be very attractive to marketing decision makers Thus appropriately constructed models can provide insights about structural relations between marketing variables Since models explicate the relations both the process of model building and the model that ultimately results can improve the quality of marketing decisions Managers often use rules of thumb for decisions For example a brand manager will have defined a specific set of alternative brands as the competitive set within a product category Usually this set is based on perceived similarities in brand characteristics advertising messages etc If a new marketing initiative occurs for one of the other brands the brand manager will have a strong inclination to react The reaction is partly based on the manager's desire to maintain some competitive parity in the marketing variables **Artificial Intelligence Applications and Innovations** Lazaros

Iliadis, Ilias Maglogiannis, Harris Papadopoulos, 2014-09-15 This book constitutes the refereed proceedings of the 10th IFIP WG 12.5 International Conference on Artificial Intelligence Applications and Innovations AIAI 2014 held in Rhodes Greece in September 2014 The 33 revised full papers and 29 short papers presented were carefully reviewed and selected from numerous submissions They are organized in the following topical sections learning ensemble learning social media and mobile applications of AI hybrid changing environments agent AGE classification pattern recognition genetic algorithms image and video processing feature extraction environmental AI simulations and fuzzy modeling and data mining forecasting

Diffusion of Technologies and Social Behavior Nebojsa Nakicenovic, Arnulf Grübler, 2013-03-14 Wee felt it before in sense but now we know it by science Edward Misselden 1623 The collective effort reported in this volume is the outcome of the diffusion of the idea of diffusion as a fundamental process in society The considerable number of disciplines represented here indicates the weight of the problem area The editors are to be congratulated for their initiative in drawing together present thinking at a vivid

meeting now also in print An old timer in the business has not much to add But maybe some things bearing in mind that a Preface is a celebration and not a review As always with ideas it is hard to identify those who first gave shape to the idea of diffusion In a general sense it is probably an observation as old as human self reflection that groups of populations exchange ideas and copy habits and implements from each other Sometimes it has even been recommended as a Chinese proverb suggested millenia ago If you want to become a good farmer look at your neighbor
