Identify and Sort Ansorge Josef Teboho, 2016 The advent of information technology ushered in new forms of political power Machines play crucial roles in how states see understand and act and scrutiny of these processes lies at the heart of Identify and Sort It frames debates about IT in world politics explaining how industrial sorting systems employed by political actors are renegotiating the social contract between individuals and the state Ansorge takes the reader on a global expedition that tracks the historical antecedents of digital power from Aztec and Inca rituals to medieval filing systems to a grandiose 1930s design for a German registry to the databases used in US presidential campaigns and how IT is deployed in war and post conflict reconstruction Databases are also deployed virtually to record and act upon people who have no publicly visible identification or group consciousness modern wars and election campaigns are fought on this individualised terrain The uneven distribution of these technical capacities engenders inequality of access while rights discourses and legal frameworks forged in an era of mass

group discrimination subjugation and public resistance lag behind these micro targeting practices Rich in examples and ideas Identify and Sort develops an analytical model and vocabulary to explain the functions and limits of digital power in world politics

Heidegger and Politics Alexander S. Duff, 2015-11-19 In this fresh interpretation of Heidegger Alexander S. Duff explains Heidegger's perplexing and highly varied political influence Heidegger and Politics argues that Heidegger's political import is forecast by fundamental ambiguities about the status of politics in his thought Duff explores how in Being and Time as well as earlier and later works Heidegger analyzes everyday human existence as both irretrievably banal but also supplying our only tenuous path to the deepest questions about human life Heidegger thus points to two irreconcilable attitudes toward politics either a total and purifying revolution must usher in an authentic communal existence or else we must await a future deliverance from the present

dispensation of Being Neither attitude is conducive to moderate politics and so Heidegger's influence tends towards extremism of one form or another modified only by explicit departures from his thought Jacques Ellul and the Technological Society in the 21st Century Helena M. Jerónimo, José Luís García, Carl Mitcham, 2013-07-08 This volume rethinks the work of Jacques Ellul 1912-1994 on the centenary of his birth by presenting an overview of the current debates based on Ellul's insights As one of the most significant twentieth century thinkers about technology Ellul was among the first thinkers to realize the importance of topics such as globalization terrorism communication technologies and ecology and study them from a technological perspective The book is divided into three sections The first discusses Ellul's diagnosis of modern society and addresses the reception of his work on the technological society the notion of efficiency the process of symbolization de symbolization and ecology The second analyzes communicational and cultural problems as well as threats and trends in early twenty first century societies Many of the issues Ellul saw as crucial such as energy propaganda applied life sciences and communication continue to be so In fact they have grown exponentially on a global scale producing new forms of risk Essays in the final section examine the duality of reason and revelation They pursue an understanding of Ellul in terms of the depth of experience and the traditions of human knowledge which is to say on the one hand the experience of the human being as contained in the rationalist sociological and philosophical traditions On the other hand there are the transcendent roots of human existence as well as revealed knowledge in the mystical and religious traditions The meeting of these two traditions enables us to look at Ellul's work as a whole but above all it opens up a space for examining religious life in the technological society
