Judging Composite Decision-Making Filipe Brito Bastos, 2024-11-14 This book examines the European Court of Justice s principles relating to composite decision making Through rigorous case law analysis it shows how these rely on national and Union observance of rule of law requirements under what the book calls the Unitary Protection doctrine It explores the theoretical dimension of this doctrine illustrating how it represents a departure from the EU s foundational federalist approach to administrative law This fills a long standing gap in the literature and in our full understanding of composite decision making a key tenet of EU law EU constitutional and administrative law scholars will be fascinated by this compelling study

**Direct Effect in EU Law** Daniele Gallo, 2024-12-23 Direct Effect in EU Law is the first book in English to thoroughly examine this revolutionary legal principle tracing direct effect s evolution throughout the multiform process of European integration A founding doctrine of EU constitutional law and the driving force of the EU legal system direct effect enables individuals and companies to invoke their rights before domestic authorities and the Court of

Justice of the EU CJEU Yet while the doctrine of direct effect remains the backbone of the EU legal system it lacks clear legal framing by the CJEU Emphasizing the need for the CJEU to fully articulate and systematize direct effect as to its core components and consequences the book advocates for an innovative understanding of such principle that acknowledges its transformative impact on EU law It bridges theory and practice drawing upon the CJEU rulings dating from the 1950s up to 2024 The book reconstructs direct effect beyond the doctrine originating from Van Gend Loos and ultimately puts forward solutions for its principled comprehension and enforcement Network-Based Governance in EC Law Maartje De Visser, 2009-11-23 To strengthen the credibility of the EU and its policies the European Community is increasingly concerned to emphasise effective enforcement of EC law This book engages in the debate on the better application of European law by offering an integrated analysis of a new institutional arrangement one that relies on networks grouping the Commission and national administrative authorities Taking the traditional enforcement paradigms of decentralisation centralisation and agency based enforcement as starting points their benefits and downsides are described and critiqued and the author concludes that there is considerable room for improvement The book then undertakes a comprehensive analysis of the network model to determine its core characteristics and assess its effectiveness European competition law and electronic communications law are used as case studies because inter alia the networks there have developed an adequate level of sophistication The book also employs a bottom up approach considering how four key Member States France Germany the Netherlands and the United Kingdom have given effect to the relevant European rules At the core of the book is a critique of the wider normative attractiveness of the network model The discussion is kaleidoscopic engaging with a wide variety of notions including legitimacy judicial review subsidiarity institutional balance and efficiency The thrust of the book is that network based governance deserves careful consideration as the model that is able to mediate the competing concerns of coherence for Internal Market reasons and of diversity and respect for local autonomy This book is useful for EC competition law and communications law practitioners and those with a keen interest in institutional and administrative law
