Multinational Work Teams A New Perspective Series In Organization And Management:

Multinational Work Teams P. Christopher Earley, Cristina B. Gibson, 2002-02-01 This authored book's purpose is to extend and consolidate the evolving literature on multinational work teams by developing a comprehensive theory that incorporates a dynamic multilevel view of such teams. The model used by the authors focuses on various features of the team's members, their interactions as a team, and the organizational context in which they operate. The concept of integration and differentiation, as well as the notion of equilibrium, are used as a general force guiding the specific processes that link various levels of analysis in the model. Providing a framework for scholars and students in the field of organizational studies, this book presents a comprehensive review of the literature related to multinational and multicultural teams, an overview of the specific model driving our thinking, along with an extensive description of the component parts: the individual and group level elements of teams and their members, the linking processes that connect various elements and structures, the catalysts that give rise to changes in various elements and structures described in the theory section, and a general integration of the model and an application of this framework for understanding MNTs in diverse cultural contexts.

Multiteam Systems Stephen J. Zaccaro, Michelle A. Marks, Leslie DeChurch, 2012-05-22 This book examines an emerging organizational form called the multi team system (MTS). This type of aggregation is being increasingly adopted by organizations and agencies that need to respond to complex strategic problems. There has been increasing interest in MTSs over the last decade to the point where there is now a need to describe these organizational forms more fully, build conceptual frames that can guide research, and begin developing tools to improve the study of MTSs. The purpose of this book is to respond to these needs. The book contains a series of chapters that expand prior conceptual frames of MTSs, defining in more detail the compositional and linkage attributes that characterize such units. The book also explores how such systems emerge and develop, as well as the methods for studying MTSs. The intent of the book is to establish and nurture a strong conceptual and methodological foundation that can guide research and practice with MTSs. Because the notion of MTSs cuts across multiple domains, this book will interest scholars in industrial organizational psychology, organizational science, management, and organizational theory, human factors, sociology, organization communications, and public administration.
