My Best Games By Anatoly Karpov:

My Best Games Anatoly Karpov, 1978 **My Best Games of Chess** Alexander Alekhine, 2013-04-17 The Genius of Alekhine In chess literature there have only been a very few chess books that have immediately and permanently established themselves as classics Lasker's Manual of Chess by Emanuel Lasker Masters of the Chessboard by Richard Reti and Dvoretsky's Endgame Manual by Mark Dvoretsky are three that come to mind There are of course others among them My Best Games of Chess 1908-1937 by the fourth world chess champion Alexander Alekhine The original English edition published three quarters of a century ago used English descriptive notation contained one photograph no crosstables and was released in two separate volumes This new 21st century edition presented with modern algebraic notation has combined both books into a single volume added more than three dozen archival photographs crosstables Alekhine's complete match and tournament records a foreword by Russian grandmaster Igor Zaitsev as well as many more diagrams A comprehensive computer assisted analytical supplement has also been prepared and is available for download at no extra charge so that if you wish you may compare Alekhine's impressive notes with the preferences of the silicon monster Whether you feel as if you are revisiting an old friend or being introduced to this splendid game collection for the first time you will marvel at how Alekhine's games and works remain in many respects extraordinarily consonant with the modern approach And you will not fail to be impressed by the genuine genius that is Alekhine **Beyond Material** Davorin Kuljasevic, 2019-09-20 Giving up material is one of the most difficult decisions a chess player has to take But the reality is that winning a game very often requires you to make that choice The nagging question is always what about my compensation The old school used to relate compensation to correctness A sacrifice was correct if the material was swiftly returned if possible with interest Generations of chess players spent lots of time counting quantifying the static value of their pieces almost by reflex In this book Grandmaster Davorin Kuljasevic teaches you how to look beyond the material balance when you evaluate positions With many instructive fragments he shows how the actual value of your pieces fluctuates during the game depending on many non material factors Some of those factors are space related such as mobility harmony outposts weaknesses structures squares files and diagonals Other factors are related to time and to the way the moves unfold tempo initiative a threat an attack Modern club players need to be able to suppress their need for immediate gratification In order to gain the upper hand you often have to live with uncertain compensation With the help of many fascinating examples Kuljasevic teaches you the essential skill of taking calculated risks After studying Beyond Material winning games by sacrificing material will become second nature to you **Learn to Play Chess Like a Boss** Patrick Wolff, 2019-09-17 Stop playing like a pawn and start playing like the king You already know just how enjoyable and challenging the game of chess can be For those who play chess leads to a lifetime of fun But how do you make the first move to learn the rules and transform from a pawn to a king The path to a perfect checkmate is in your hands In the pages of this book you will find an introduction to all the chess pieces
