**Agricultural Innovation Systems** The World Bank, 2012-02-21 Managing the ability of agriculture to meet rising global demand and to respond to the changes and opportunities will require good policy sustained investments and innovation not business as usual Investments in public Research and Development extension education and their links with one another have elicited high returns and pro poor growth but these investments alone will not elicit innovation at the pace or on the scale required by the intensifying and proliferating challenges confronting agriculture Experience indicates that aside from a strong capacity in Research and Development the ability to innovate is often related to collective action coordination the exchange of knowledge among diverse actors the incentives and resources available to form partnerships and develop businesses and conditions that make it possible for farmers or entrepreneurs to use the innovations While consensus is developing about what is meant by innovation and innovation system no detailed blueprint exists for making agricultural innovation happen at a given time in a given place for a given result The AIS approach that looks at these multiple conditions and relationships that promote innovation in agriculture has however moved from a concept to a sub discipline with principles of analysis and action AIS investments must be specific to the context responding to the stage of development in a particular country and agricultural sector especially the AIS This sourcebook contributes to identifying designing and implementing the investments approaches and complementary interventions that appear most likely to strengthen AIS and to promote agricultural innovation and equitable growth It emphasizes the lessons learned benefits and impacts implementation issues and prospects for replicating or expanding successful practices The information in this sourcebook derives from approaches that have been tested at different scales in different contexts It reflects the experiences and evolving understanding of numerous individuals and organizations concerned with agricultural innovation including the World Bank This information is targeted to the key operational staff in international and regional development agencies and national governments who design and implement lending projects and to the practitioners who design thematic programs and technical assistance packages The sourcebook can also be an important resource for the research community and nongovernmental organizations NGOs

**Intellectual Property Policy, Law and Administration in Africa** Caroline B. Ncube, 2015-10-16 This book examines the harmonisation of Intellectual Property IP policy law and administration in Africa Two recent developments have brought this topic to the fore The first is the escalation of long standing efforts to establish a Pan African Intellectual Property Organisation PAIPO a continental initiative The second is the current sub regional attempt to operationalise the IP provisions of the Southern African Development Community SADC s Protocol on Trade articles 9b and 24 and its Protocol on Science Technology and Innovation article 2m Intellectual Property Policy Law and Administration in Africa discusses the viability of such initiatives with particular reference to the current socio economic status of Africa s nations With a view to contributing to future developments in Africa at both a continental and sub regional level the author

considers this issue through the lens of advancing the public interest in IP Ncube argues that harmonisation initiatives ought to be crafted in a way that is supportive of the development aspirations of African states Consequently she urges due consideration of individual states unique conditions and aspirations in any harmonisation venture a necessity outlined in article 7 of the Agreement on Trade Related Aspects of Intellectual Property Rights This book will be of great relevance to scholars and policy makers with an interest in IP law and African law in general *Great Books Written by Africans across the Academic Disciplines* Emmanuel D. Babatunde, Abdul Karim Bangura, 2022-07-04 This volume is the first text to provide a comprehensive account of the great books across the academic disciplines written by Africans born in the continent and those who became naturalized citizens of African countries These great books are those that have had a powerful important or affecting influence on the author of a chapter in this book as an individual and on society The books included here are mostly of the storytelling type and thus not representative of most of the academic disciplines This volume allows each contributor to write a chapter on a discipline showcasing five great books written by African authors Each selection is appraised and suggestions made by other experts in a discipline while every chapter entails an introduction to the topic a conceptual discussion of the discipline a book by book review of the five books and a conclusion and recommendations for research using the selected books
