

QUALITATIVE RESEARCH

Qualitative research is an investigative approach that aims to understand and interpret social phenomena through subjective experiences, meanings, and perspectives.

OVERVIEW

Qualitative research emphasizes exploring the depth and complexity of human behavior, attitudes, and interactions rather than quantifiable measurements. This research method relies on methods such as interviews, observations, and analysis of textual or visual data to gather rich and detailed insights.

EXAMPLES

- **Grounded Theory:** Grounded theory allows patterns and themes to emerge from the data rather than imposing preconceived theories.
- **Ethnography:** Ethnography involves immersing researchers in a social group to understand their behaviors, beliefs, and values through participant observation.

Aid and conditionality: Enhancing good governance in sub-Saharan Africa Fidelis Etah Ewane, 2008-10-13 Master s Thesis from the year 2004 in the subject Politics Region Africa grade Merit University of Kent language English abstract The persistent low state of development in sub Saharan Africa has become a global challenge Academics and think tanks continue to search for solutions to Africa s longstanding problems Studies have proven that the entire region is essentially confronted with a crisis of social structures and government and the fragmentation of authority is the hallmark of this crisis Van Hoyweghen Smis 2002 575 Over twenty four million people are infected with AIDS HIV growth of per capita income is low and civil wars have killed millions in Rwanda Burundi Liberia Sierra Leone and the Democratic Republic of Congo African governments owe billions of dollars in debt Polanyi 2003 563 This irreversible trend brought the good governance discourse in development cooperation between the donors and African counterparts The purpose of this paper is to examine how the concept of good governance is being implemented in Africa For clarity purposes the work is limited to the analysis of the efforts being made by the European Union EU and the World Bank in assisting African countries to implement good governance This choice is based on the fact that the EU and World Bank are the main multilateral aid donors and development partners of the region It argues that good governance enhances transparency in the use of development aid helps to reduce poverty and spurs development and that it is necessary to foster institutional reforms causative argument The paper further argues that implementing good governance will improve the use of political power by leaders and help in the consolidation of peace normative argument Achieving global governance is a main issue in international politics today Enforcing good governance is a must if Africa has to be fully integrated into the process of globalisation And for globalisation to be complete and meaningful poverty in Africa as well as other parts of the world must be eradicated No amount of foreign aid can lead to meaningful development without effective governance The poor state of development in Africa produces a

backlash that has a global reach Europe for example is facing a huge influx of migrants from Africa in search for greener pastures Eradicating poverty is therefore a global challenge as the world becomes smaller The fight against poverty and underdevelopment has given rise to a greater inter state relationship in which powerful institutions play a decisive role

Elite Dualism and Leadership Selection in China Xiaowei Zang, 2004-03-01 Who are the top political leaders in China What are the major criteria in elite recruitment How is job promotion in high politics determined By studying over one and a half thousand top political Chinese leaders this book seeks to answer these questions and as a result defines how Chinese leadership is stratified Unlike existing research on Chinese leaders *Elite Dualism and Leadership Selection in China* draws on extensive statistical information and data analysis It evidences how political development in the reform era has led to the division of labour between the Chinese Communist Party CCP and the government in governance leading to two distinctive career paths in the two political systems respectively Key issues examined include the different criteria the CCP and the government demand the requirements for promotion the effect of university education on the rate of mobility the different affiliations of the two groups the role of cooptation in leadership selection Many of the elites discussed are still leading figures in China making this book the most up to date and extensive biographical data set in elite studies This allows for a meaningful analysis of elite behaviour in China for the first time in Chinese Studies This book will be useful to both students of Chinese studies and comparative politics and will also interest researchers political commentators statesmen and China watchers
