Oxford Studies in Agency and Responsibility Volume 5 D. Justin Coates, Neal A. Tognazzini, 2019-02-07 Oxford Studies in Agency and Responsibility is a series of volumes presenting outstanding new work on a set of connected themes investigating such questions as What does it mean to be an agent What is the nature of moral responsibility Of criminal responsibility What is the relation between moral and criminal responsibility if any What is the relation between responsibility and the metaphysical issues of determinism and free will What do various psychological disorders tell us about agency and responsibility How do moral agents develop How does this developmental story bear on questions about the nature of moral judgment and responsibility What do the results from neuroscience imply if anything for our questions about agency and responsibility No one has written more insightfully on the promises and perils of human agency than Gary Watson who has spent a career thinking about issues such as moral responsibility blame free will weakness of will addiction and psychopathy This special edition of OSAR pays tribute to Watson's work by taking up and extending themes from his pioneering essays

The Oxford Handbook of Moral Psychology Manuel Vargas, John Doris, 2022 The Oxford Handbook of Moral Psychology is a comprehensive multidisciplinary state of the art overview of moral psychology The 50 chapters written by leading figures in both philosophy and psychology cover many of the most important topics in the field and form the definitive survey of contemporary moral psychology

The Philosophy of Trust Paul Faulkner, Thomas Simpson, 2017 Trust is central to our social lives We know by trusting what others tell us We act on that basis and on the basis of trust in their promises and implicit commitments So trust underpins both epistemic and practical cooperation and is key to philosophical debates on the conditions of its possibility It is difficult to overstate the significance of these issues On the practical side discussions of cooperation address what makes society possible of how it is that life is not a Hobbesian war of all against all On the epistemic side discussions of cooperation address what makes the pooling of knowledge possible and so the edifice that is science But trust is not merely central to our lives instrumentally trusting relations are themselves of great value and in trusting others we realise distinctive forms of value What are these forms of value and how is trust central to our lives These questions are explored and developed in this volume which collects fifteen new essays on the philosophy of trust They develop and extend existing philosophical discussion of trust and will provide a reference point for future work on trust

The Oxford Handbook of the Responsibility to Protect Alex Bellamy, Tim Dunne, 2016-06-30 The Responsibility to Protect R2P is intended to provide an effective framework for responding to crimes of genocide ethnic cleansing war crimes and crimes against humanity It is a response to the many conscious shocking cases where atrocities on the worst scale have occurred even during the post 1945 period when the United Nations was built to save us all from the scourge of genocide The R2P concept accords to sovereign states and international institutions a responsibility to assist peoples who are at risk or experiencing the worst atrocities R2P maintains that collective action should be taken by members of the United Nations to

prevent or halt such gross violations of basic human rights This Handbook containing contributions from leading theorists and practitioners including former foreign ministers and special advisors examines the progress that has been made in the last 10 years it also looks forward to likely developments in the next decade *Aristotle on Shame and Learning to Be Good* Marta Jimenez, 2021-01-14 This book presents a novel interpretation of Aristotle's account of how shame instils virtue and defends its philosophical import Shame is shown to provide motivational continuity between the actions of the learners and the virtuous dispositions that they will eventually acquire **The Routledge Companion to Free Will** Kevin Timpe, Meghan Griffith, Neil Levy, 2016-11-18 Questions concerning free will are intertwined with issues in almost every area of philosophy from metaphysics to philosophy of mind to moral philosophy and are also informed by work in different areas of science principally physics neuroscience and social psychology Free will is also a perennial concern of serious thinkers in theology and in non western traditions Because free will can be approached from so many different perspectives and has implications for so many debates a comprehensive survey needs to encompass an enormous range of approaches This book is the first to draw together leading experts on every aspect of free will from those who are central to the current philosophical debates to non western perspectives to scientific contributions and to those who know the rich history of the subject Chapter 37 of this book is freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4.0 license *Oxford Studies in Agency and Responsibility* David Shoemaker, 2015 **A Pragmatic Approach to Agency in Group Activity** Herman Witzel, 2019-11-18 A Pragmatic Approach to Agency in Group Activity builds towards an action theory that explains how new forms agency develop in group activity The approach starts from practical insights about group activity and develops a new understanding of agency from there This study shows how practical interactions and structures in group activity disrupt individual agency It is concluded that important features of agency can be realized on a group level Different types of group activities are analyzed in order to better understand these mechanisms and consequently revisit our understanding of agency It is argued that intentionality the key concept in individual action theory merely serves as a pseudo explanatory connection between specific features of agency and their realization in humans This is contrasted with empirical research showing that how humans act is far from the idealized concept of intentionality Consequently intentionality as a key explanatory concept is rejected and replaced by a diverse set of features of agency for a similarly diverse set of kinds of agency In this view groups display new forms agency beyond individual agency without making the groups agents themselves Such is the nature of group agency *The Church Times*, 1904 *The Oneness Hypothesis* Philip J. Ivanhoe, Owen Flanagan, Victoria S. Harrison, Eric Schwitzgebel, Hagop Sarkissian, 2018-06-26 The idea that the self is inextricably intertwined with the rest of the world the oneness hypothesis can be found in many of the world's philosophical and religious traditions Oneness provides ways to imagine and achieve a more expansive conception of the self as fundamentally connected with other people creatures

and things Such views present profound challenges to Western hyperindividualism and its excessive concern with self interest and tendency toward self centered behavior This anthology presents a wide ranging interdisciplinary exploration of the nature and implications of the oneness hypothesis While fundamentally inspired by East and South Asian traditions in which such a view is often critical to their philosophical approach this collection also draws upon religious studies psychology and Western philosophy as well as sociology evolutionary theory and cognitive neuroscience Contributors trace the oneness hypothesis through the works of East Asian and Western schools including Confucianism Mohism Daoism Buddhism and Platonism and such thinkers as Zhuangzi Kant James and Dewey They intervene in debates over ethics cultural difference identity group solidarity and the positive and negative implications of metaphors of organic unity Challenging dominant views that presume that the proper scope of the mind stops at the boundaries of skin and skull The Oneness Hypothesis shows that a more relational conception of the self is not only consistent with contemporary science but has the potential to lead to greater happiness and well being for both individuals and the larger wholes of which they are parts Research Handbook of Sustainability Agency Teerikangas, Satu, Onkila, Tiina, Koistinen, Katariina, Mäkelä, Marileena, 2021-07-31 This innovative Research Handbook answers crucial questions about how individuals and organisations can make a difference towards sustainability Offering an integrative perspective on sustainability agency it reviews individual active organisational and relational forms of sustainability agency demonstrating the capacity of individuals and organisations to act toward sustainable futures *The Early Confucian Philosophy of Agency* Henrique Schneider, 2024-02-02 Henrique Schneider argues that understanding the three Early Confucian thinkers Confucius Mencius and Xunzi as virtue ethicists political philosophers or social conservatives proves too narrow Championing a broader and more philosophical reading The Early Confucian Philosophy of Agency Virtuous Conduct sheds new light on a well established topic Virtuous conduct aligning actions and motivations with virtues social roles and rituals is the philosophy of agency of Early Confucianism Confucius Mencius and Xunzi share a common philosophy of agency which does more than describe agents and acts it also represents a progressive social and political program Schneider characterizes Early Confucianism as a progressive philosophy due to its human centered program for social reform its process view of self cultivation and its development Agents who cultivate themselves can produce virtuous conduct flourish and become Junzi This lets them lead each other in self cultivation social environment and polity As such virtuous conduct integrates ethics social and political philosophy in a theory of action

Does Neuroscience Have Normative Implications? Geoffrey S. Holtzman, Elisabeth Hildt, 2020-10-31 This book brings together a number of essays that are optimistic about the ways certain neuroscientific insights might advance philosophical ethics and other essays that are more circumspect about the relevance of neuroscience to philosophical ethics As a whole the essays form a self reflective body of work that simultaneously seeks to derive normative ethical implications from neuroscience and to question whether and how that may be possible at all In doing so the collection brings together psychology neuroscience philosophy of mind ethics and philosophy of science Neuroscience seeks to understand the biological systems that guide human behavior and cognition Normative ethics on the other hand seeks to understand the system of abstract moral principles dictating how people ought to behave By studying how the human brain makes moral judgments can philosophers learn anything about the nature of morality itself A growing number of researchers believe that neuroscience can indeed provide insights into the questions of philosophical ethics However even these advocates acknowledge that the path from neuroscientific is to normative ethical ought can be quite fraught
