

Step #1: Ask a Ques

Have you been won about something sci

The first step is ask a question

Use the Internet to find out what others know about this question.

Just type the question in the search bar, and add "for kids" to get simpler answers.

Step #3: Hypothesize

Now it's time to answer the question. The hypothesis states what you **think** will happen, based on your background knowledge and research.

It's time to plan your experiment!

To make sure your

nt will answer

Step #5: Make observal

A scientist r observation

This involves mc just looking. You measure carefull scientific too

Step #6: Record Results.

As you observe, you must also record your results.

What does this mean?

You must write down everything you've observed.

Step #7: Draw

Conclusions

Now you must think about the question again.

Which will evaporate more, water in an open cup or water in a covered cup?

To draw a conclusion, answer based on your results.

Step #8: Share Results

To share your results with others, you must put them in a format that is easy to understand. For example:

Jenice Goldston, Laura Downey, 2012-01-18 Designed around a practical practice what you teach approach to methods instruction Your Science Classroom Becoming an Elementary Middle School Science Teacher is based on current constructivist philosophy organized around 5E inquiry and guided by the National Science Education Teaching Standards Written in a reader friendly style the book prepares instructors to teach science in ways that foster positive attitudes engagement and meaningful science learning for themselves and their students Elementary Science Methods Andrew Martin, David Jerner Martin, 2002-07 This popular text is the first science methods

book to truly practice what it preaches using a constructivist approach to guide students in learning how to teach in a constructivist manner. The text includes a wealth of open ended inquiry activities such as Constructing Your Ideas for students to complete in class. These activities help students to construct their own personal conceptualizations about teaching science in the elementary school. This text also features over 170 process oriented activities for children including Constructing Science in the Classroom and In the Schools each keyed to grade levels and each open ended so teachers can encourage children to develop and perform their own investigations. All activities are linked to National Science Education Standards for appropriate content professional development assessment and teaching and the activities contain suggestions of appropriate accompanying children's literature Martin's text takes the approach that it is more important for children to learn how to do science than it is for them to learn about science Children learn how to do science by mastering the scientific processes and applying them in inquiries into scientific questions Employing the constructivist approach teachers help children form personally constructed meanings from their own experience and thought. The text is predicated on the reality that teachers of elementary science do not need to know a great deal of science to be good science teachers but need to be co inquirers with their students.

Elementary Science Methods Lauren Madden, 2022-01-12 As teachers and parents we often hear that children are the best scientists Great science teachers tune in to children's interests and observations to create engaging and effective lessons This focus on the innate curiosity of children or humans overall is celebrated and used to justify and support efforts around STEM teaching and learning Yet when we discuss elementary school teachers we often hear many inside and outside the classroom report that these teachers dislike fear and feel uncomfortable with science This is exactly the opposite approach from what is universally recommended by science education scholars. This practical textbook meets the immediate contextual needs of future and current elementary teachers by using an assets based approach to science teaching showing how to create inquiry based lessons differentiate instruction and lesson design based on children's developmental ages and needs and providing easy to use tools to advocate for scientific teaching and learning guided by the Next Generation Science Standards NGSS Constructing Meaning in a Science Methods Course for Prospective Elementary Teachers Barbara S.
