Services Process Improvement Andreas Riel, Rory O'Connor, Serge Tichkiewitch, Richard Messnarz, 2010-09-02 A typical
 characterization of EuroSPI is reflected in a statement made by a company the biggest value of EuroSPI lies in its function as a
 European knowledge and experience exchange mechanism for SPI and innovation Since its beginning in 1994 in Dublin the
 EuroSPI initiative has outlined that there is not a single silver bullet to solve SPI issues but that you need to understand a
 combination of different SPI methods and approaches to achieve concrete benefits The fore each proceedings volume covers a

variety of different topics and at the conference we discuss potential synergies and the combined use of such methods and approaches. These proceedings contain selected research papers for five topics: Section I SPI Tools, Section II SPI Methods, Section III SPI in SMEs, Section IV Economic Aspects of SPI, and Section V The Future of SPI. Section I presents studies on SPI tools. The authors provide an insight into new tools which can be used for SPI. Willem Bekkers et al. present a new assessment method and tool for software product management. Ismael Edrei Espinosa Curiel et al. illustrate a graphical approach to support the teaching of SPI. Paul Clarke and coworkers deal with an analysis and a tool to help real adoption of standards like ISO 12207 and they focus on SPI implementation and practices. Esparanca Amengual et al. present a new team-based assessment method and tool.

IT Audit, Control, and Security Robert R. Moeller, 2010-10-12. When it comes to computer security, the role of auditors today has never been more crucial. Auditors must ensure that all computers, in particular those dealing with e-business, are secure. The only source for information on the combined areas of computer audit, control, and security is the IT Audit, Control, and Security. It describes the types of internal controls, security, and integrity procedures that management must build into its automated systems. This very timely book provides auditors with the guidance they need to ensure that their systems are secure from both internal and external threats.
