Lewis, 2016-03-04 An account of the movement for sustainable development in Ecuador through four eras movement origins neoliberal boom neoliberal bust and citizens revolution Ecuador is biologically diverse petroleum rich and economically poor Its extraordinary biodiversity has attracted attention and funding from such transnational environmental organizations as Conservation International the World Wildlife Fund and the United States Agency for International Development In Ecuador itself there are more than 200 environmental groups dedicated to sustainable development and the country's 2008 constitution grants constitutional rights to nature The current leftist government is committed both to lifting its people out of poverty and pursuing sustainable development but petroleum extraction is Ecuador's leading source of revenue While extraction generates economic growth which supports the state's social welfare agenda it also causes environmental destruction Given these competing concerns will Ecuador be able to achieve sustainability In this book Tammy Lewis examines the movement for sustainable development in Ecuador through four eras movement origins 1978 to 1987 neoliberal boom 1987 to 2000 neoliberal bust 2000 to 2006 and citizens revolution 2006 to 2015 Lewis presents a typology of Ecuador's environmental organizations ecoimperialists transnational environmentalists from other countries ecodependents national groups that partner with transnational groups and ecoresisters home grown environmentalists who reject the dominant development paradigm She examines the interplay of transnational funding the Ecuadorian environmental movement and the state's environmental and development policies Along the way addressing literatures in environmental sociology social movements and development studies she explores what configuration of forces political economic and environmental is most likely to lead to a sustainable balance between the social system and the ecosystem [The Oxford Companion to Comparative Politics](#) Joel Krieger, 2013 The two volume Oxford Companion to Comparative Politics fills a gap in scholarship on an increasingly important field within Political Science Comparative Politics the discipline devoted to the politics of other countries or peoples has been steadily gaining prominence as a field of study allowing politics to be viewed from a wider foundation than a concentration on domestic affairs would permit Comparativists apply various theories and concepts to analyze the similarities and differences between political units using the results of their research to develop causalities and generalizations Each of these theories and outcomes are thoroughly defined in the Companion as are major resultant conclusions those comparativists who have influenced the field in significant ways and politicians whose administrations have shaped the evaluation of contrasting governments Approximately 200 revised and updated articles from the Oxford Companion to Politics of the World would serve as a foundation for the set while over 100

new entries would thoroughly examine the field in a lasting more theoretical than current event based way New entries cover such topics as failed states Grand Strategies and Soft Power important updates include such countries as China and Afghanistan and issues like Capital Punishment Gender and Politics and Totalitarianism Country entries include the most significant nations to permit a focus on non time sensitive analysis In addition 25 1 000 word interpretive essays by notable figures analyze the discipline its issues and accomplishments Collectively entries promote deeper understanding of a field that is often elusive to non specialists

**Fortune Favors the Bold** Lester C. Thurow,2009-10-13

Bestselling author and renowned economist Lester Thurow argues forcefully that globalization is not a done deal and we must seize the moment now if we are to create a new global economy in which all can prosper In this new book Thurow

examines the newly forming global economy with a special focus on the role of the US and the dangers to our own national well being He examines such questions as What s at stake for us in the global economy Why is it important that the system be equitable and that other countries prosper along with us What should our goals as a nation be long term and short term What are the tough choices that need to be made in our relationship with other countries and world regulatory bodies What role should we be playing globally What are the political economic social choices tradeoffs we will have to confront Thurow contends that the huge and growing US trade deficit poses grave dangers to the value of the dollar and is putting our own economy in jeopardy As the world economy leaps national boundaries its hallmark seems to be a rising instability and a growing inequality between the first and third worlds Financial crises in the third world come ever more frequently and seem to be ever more severe The first world economies seem to be in ever more frantic boom and bust cycles Globalization causes riots throughout the world and is one factor in the rise of terrorism against the West Thurow shows how some nations including Ireland and China have embraced the concept of globalization and placed themselves into a position to prosper with growing and productive national economies He contrasts their positive actions with Japan whose leaders have allowed the nation to drift into stagnation and have destroyed its prosperity He argues that this is the time to choose globalization or be left behind the time to build a global economy that eliminates the defects and he provides plenty of ideas for corporations governments economists and citizens to act upon

Europe for a greater understanding of geographic interrelationships This comprehensive volume is a first stop reference source for the most significant political cultural and economic conflicts in North America and Europe today     **Becoming Campesinos** Christopher Robert Boyer,2003 Becoming Campesinos argues that the formation of the campesino as both a political category and a cultural identity in Mexico was one of the most enduring legacies of the great revolutionary upheavals that began in 1910 The author maintains that the understanding of popular class unity conveyed by the term campesino originated in the interaction of post revolutionary ideologies and agrarian militancy during the 1920s and 1930s The book uses oral histories archival documents and partisan newspapers to trace the history of one movement born of this dynamic agrarismo in the state of Michoacán     **Non-Aligned Movement Summits** Jovan Cavoški,2022-05-19 Using newly declassified documents from Serbian British Indian Chinese Myanmar U S and Soviet archives Non Aligned Movement Summits shows how the Non Aligned Movement NAM gradually evolved into the third force of Cold War politics enveloping most of the post colonial and non bloc world Jovan Cavo ki follows the evolution of the NAM through its summits and other gatherings during which major political decisions pertaining to the destiny of the Third World were made These events were scrutinized by all major powers and had a corresponding effect on their policies From the Belgrade Conference in 1961 until 1989 all major Third World and non bloc nations met to demonstrate to the Eastern and Western Blocs that they were independent active and respected participants in world affairs Cavo ki shows how these summits were also closely related to events occurring in the relationship between the two blocs providing opportunities for non bloc actors to influence the global balance of power By moving the focus of 20th century international history away from the bloc nations and instead giving developing nations in Africa and Asia due attention this book provides a fresh perspective on Cold War history and fills a significant gap in the literature It is an important study for all students and scholars of the Cold War and international history
