Green Michel Pastoureau, 2023-06-13 In this beautiful and richly illustrated book the acclaimed author of Blue and Black presents a fascinating and revealing history of the color green in European societies from prehistoric times to today Examining the evolving place of green in art clothes literature religion science and everyday life Michel Pastoureau traces how culture has profoundly changed the perception and meaning of the color over millennia and how we misread cultural social and art history when we assume that colors have always signified what they do today Filled with entertaining and enlightening anecdotes Green shows that the color has been ambivalent a symbol of life luck and hope but also disorder greed poison and the devil Chemically unstable green pigments were long difficult to produce and even harder to fix Not surprisingly the color has been associated with all that is changeable and fleeting childhood love and money Only in the Romantic period did green definitively become the color of nature Pastoureau also explains why the color was connected with the Roman emperor Nero how it became the color of Islam why Goethe believed it was the color of the middle class why some nineteenth century scholars speculated that the ancient Greeks couldn't see green and how the color was denigrated by Kandinsky and the Bauhaus More broadly Green demonstrates that the history of the color is to a large degree one of dramatic reversal long absent ignored or rejected green today has become a ubiquitous and soothing presence as the symbol of environmental causes and the mission to save the planet With its striking design and compelling text Green will delight anyone who is interested in history culture art fashion or media

Red Michel Pastoureau, 2023-06-13 A beautifully illustrated visual and cultural history of the color red throughout the ages The color red has represented many things from the life force and the divine to love lust and anger Up through the Middle Ages red held a place of privilege in the Western world For many cultures red was not just one color of many but rather the only color worthy enough to be used for social purposes In some languages the word for red was the same as the word for color The first color developed for painting and dying red became associated in antiquity with war wealth and power In the medieval period red held both religious significance as the color of the blood of Christ and the fires of Hell and secular meaning as a symbol of love glory and beauty Yet during the Protestant Reformation red began to decline in status Viewed as indecent and immoral and linked to luxury and the excesses of the Catholic Church red fell out of favor After the French Revolution red gained new respect as the color of progressive movements and radical left wing politics In this beautifully illustrated book Michel Pastoureau the acclaimed author of Blue Black and Green now masterfully navigates centuries of symbolism and complex meanings to present the fascinating and sometimes controversial history of the color red Pastoureau illuminates red's evolution through a diverse selection of captivating images including the cave paintings of Lascaux the works of Renaissance masters and the modern paintings and stained glass of Mark Rothko and Josef Albers

Pastoureau,2023-06-13 The story of the color black in art fashion and culture from the beginning of history to the twenty first century Black favorite color of priests and penitents artists and ascetics fashion designers and fascists has always stood for powerfully opposed ideas authority and humility sin and holiness rebellion and conformity wealth and poverty good and bad In this beautiful and richly illustrated book the acclaimed author of Blue now tells the fascinating social history of the color black in Europe In the beginning was black Michel Pastoureau tells us The archetypal color of darkness and death black was associated in the early Christian period with hell and the devil but also with monastic virtue In the medieval era black became the habit of courtiers and a hallmark of royal luxury Black took on new meanings for early modern Europeans as they began to print words and images in black and white and to absorb Isaac Newton s announcement that black was no color after all During the romantic period black was melancholy s friend while in the twentieth century black and white came to dominate art print photography and film and was finally restored to the status of a true color For Pastoureau the history of any color must be a social history first because it is societies that give colors everything from their changing names to their changing meanings and black is exemplary in this regard In dyes fabrics and clothing and in painting and other art works black has always been a forceful and ambivalent shaper of social symbolic and ideological meaning in European societies With its striking design and compelling text Black will delight anyone who is interested in the history of fashion art media or design Feeling blue Victoria Bates,2025-08-19

Blue Jeans Carolyn Purnell, 2022-12-15 *Object Lessons* is a series of short beautifully designed books about the hidden lives of ordinary things. Few clothing items are as ubiquitous or casual as blue jeans. Yet their simplicity is deceptive. Blue jeans are nothing if not an exercise in opposites. Americans have accepted jeans as a symbol of their culture, but today jeans are a global consumer product category. Levi Strauss made blue jeans in the 1870s to withstand the hard work of mining, but denim has since become the epitome of leisure. In the 1950s celebrities like Marlon Brando transformed the utilitarian clothing of industrial labor into a glamorous statement of youthful rebellion, and now you can find jeans on chic fashion runways. For some, indigo blue might be the color of freedom, but for workers who have produced the dye, it has often been a color of oppression and tyranny. *Blue Jeans* considers the versatility of this iconic garment and investigates what makes denim a universal signifier ready to fit any context, meaning, and body. *Object Lessons* is published in partnership with an essay series in *The Atlantic*.

Blue by Fire: A Marker of the Technical History of Glass and Ceramics Howell G. M. Edwards, Philippe Colomban, 2025-01-27 The use of natural mineral and synthetic blue pigments in antiquity for wall paintings and illuminated manuscript historiation evolved into the most suitable blue pigments for the decoration of glazed and enamelled wares, ceramics, glass, and metal, which required a stability at the high temperatures of the kilns used for glazing and firing. Historic literature is often vague regarding the blue pigments used for this purpose. The generic term cobalt blue covers a wide range of pigments that were actually used for the decoration of faience, majolica, stonewares, earthenwares, and porcelains. This book addresses the application of elemental and molecular spectroscopic analytical techniques to a range of diverse problems which arise for decorated ceramics, glass, and enamels, and related artefacts: a history of techniques, provenance, and authentication. The text contains an introduction to the important analytical techniques that are used in destructive and nondestructive analytical measurements and highlights potential future applications based upon novel miniaturised instrumentation for in situ studies. The book is co-authored by two international experts with many years' experience in the application of analysis to artworks and archaeological artefacts and in the investigation of materials and sites for cultural heritage preservation. Among 19 chapters, one is devoted to an evaluation of the analytical techniques that are used and the pitfalls which can arise in the interpretation of the data. The approach conveys the detailed information which has become available from the adoption of analytical techniques to diverse problems through the scientific interrogation of ceramic and related artefacts. Examples are given of how the pigment analysis and sourcing can provide unique information about ancient trade routes and pigment sourcing historically. A classic instance is provided by the transfer of European enamelling technologies carried out at the beginning of the 17th century in Japan (Arita) and at the turn of the 17th-18th centuries in China by the Jesuits established at the Court of respectively the Kyushu island of Dejmios and the Chinese Qing Emperor Kangxi. It has hence been demonstrated that some of the most beautiful porcelains emanating from

Japan and China in this period incorporate blue decoration with pigments supplied from Europe The interpretation of the analytical data can assist museum curators archaeologists art dealers experts and cultural heritage historians in the preservation and conservation of ancient materials which have applied blue pigment decoration **Rarest Blue** Baruch Sterman,2012-11-20 Scholar and layman But beyond that it spans a rich spectrum of disciplines in the realms of science and the humanities as it tracks a historical saga across many generations The Stermans have done a masterful job in relating this captivating tale Rabbi Dr Ari Zivotofsky Interdisciplinary Program for Brain Science Bar Ilan University According to tradition as described beautifully in The Rarest Blue white symbolizes purity and blue the color of the heavens represents holiness The white combined with the blue tekhelet conveys the message that a mortal can indeed achieve a state of holiness and the tekhelet string points the direction to a truly spiritual life Rabbi Dr Abraham J Twerski M D
