Endogenous Market Structures and the Macroeconomy Federico Etro,2009-06-17 This is a key year for the evolution of international markets The global economy is experiencing the most severe downturn since the thirties it is temporarily leaving a path of sustained growth that characterized the last decades and is facing an impressive decline of trade between countries Banks are going bankrupt the stock market has crashed firms are going out of business or drastically reducing their production and exports workers are being laid off and investment in new business creation or innovation is shrinking Meanwhile consumers confidence has dropped at its minimum aggregate demand has been declining for months and expansionary policies and international coordination have failed to counteract the crisis until now It is quite likely that all this will change sooner or later but at the end of this crisis our understanding of the macroeconomy may change as well In front of these crucial events this book is not an attempt at proposing a radically new way of interpreting macroeconomic phenomena and as a matter of fact it is not even a book on macroeconomic theory My more modest goal is to collect a number of insights derived from recent research on the role of competition and innovation in the analysis of three topics business cycles trade and growth through innovations

Perspectives in Industrial Organization B. Dankbaar,John Groenewegen,H. Schenk,2012-12-06 This book contains the key note lectures and a selection of papers that were presented at the 15th Conference of the European Association for Research in Industrial Economics EARIE held under the auspices of GRASP at Erasmus University Rotterdam in 1988 plus an introductory chapter by the Editors Upon suggestions by the Editors all papers have been revised for this book some more extensively than others Robin Marris has added to his lecture a synopsis of the contributions to the Round Table on the Micro Macro Interface which he chaired during the Conference The papers cover issues that seem to be both interesting and relevant for the 1990s While some of the papers are cast in a rather established research frame enabling the use of regular academic routines others are first attempts at delineating the contours of areas that are peripheral to what is often considered as the core of Industrial Organization In their introductory

chapter the Editors set forth that a neglect of those areas may well relegate Industrial Organization to social irrelevancy Therefore it is hoped that the book will also contribute to a reflection on the main lines of Industrial Organization research for the 1990s thus helping to create a healthy perspective for this part of economics at a time when macroeconomics is undergoing a severe crisis
