Women in Microbiology Rachel J. Whitaker,Hazel B. Barton,2020-07-02 Many girls want to become scientists when they grow up just like many boys do But for these girls the struggle to do what they love and to be treated with respect has been much harder because of the discrimination and bias in our society In *Women in Microbiology* we meet women who despite these obstacles and against tough odds have become scientific leaders and revered mentors The women profiled in this collection range from historic figures like Alice Catherine Evans and Ruth Ella Moore to modern heroes like Michele Swanson and Katrina Forest What binds all of these remarkable women are a passion for their work a zest for life a warm devotion to mentoring others especially younger women and a sense of justice and fairness that they are willing to fight tirelessly to obtain Each story is unique but each woman featured in *Women in Microbiology* has done so much to expand our knowledge of the natural world while also making it easier for the next generation of scientists to work collaboratively and in an atmosphere where people are judged by their intellect imagination skill and commitment to service regardless of gender or race *Women in Microbiology* is a wonderful collection of stories that will inspire everyone but especially young women and men who are wondering how to find their way in the working world Some of the names are familiar and some are lesser known but all of the stories arouse a sense of excitement driven by tales of new important scientific insights stories of overcoming adversity and breaking boundaries and the inclusion of personal tips and advice from successful careers These stories are proof that a person can live a balanced and passionate life in science that is rich and rewarding
