to use the microbial communities and microbial data literature and the research materials themselves as a test case the Board on Research Data and Information held an International Symposium on Designing the Microbial Research Commons at the National Academy of Sciences in Washington DC on 8 9 October 2009 The symposium addressed topics such as models to lower the transaction costs and support access to and use of microbiological materials and digital resources from the perspective of publicly funded research public private interactions and developing country concerns The overall goal of the symposium was to stimulate more research and implementation of improved legal and institutional models for publicly funded research in microbiology
