Partnering Against Terrorism Summary Of A Workshop Government Industry Partnerships:

Partnering Against Terrorism National Research Council, Policy and Global Affairs, Board on Science, Technology, and Economic Policy, Committee on Government-Industry Partnerships for the Development of New Technologies, Charles W. Wessner, 2005-08-08 Terrorism and the measures needed to prevent terrorist attacks pose a central policy challenge for the U S To meet this unprecedented challenge the U S has great technological assets What is needed are mechanisms to help the government draw on these strengths in a timely and effective fashion To do so the government needs to reach out to university researchers national laboratories small high tech businesses and leading corporations One of the most effective ways to do this is through public private partnerships To link the lessons of the National Academies study on Government Industry Partnerships to this critical national interest the Academy organized a conference to bring the lessons of its analysis to bear on the war on terror By encouraging policy attention to examples of effective public private partnerships in particular the need for clear goals and regular assessments this report contributes to a better understanding of the potential partnerships to bring new security enhancing technologies and equipment to the market in a cost effective and timely manner

Hidden Costs of Energy National Research Council, Policy and Global Affairs, Board on Science, Technology, and Economic Policy, Division on Engineering and Physical Sciences, Board on Energy and Environmental Systems, Division on Earth and Life Studies, Board on Environmental Studies and Toxicology, Committee on Health, Environmental, and Other External Costs and Benefits of Energy Production and Consumption, 2010-05-26 Despite the many benefits of energy most of which are reflected in energy market prices the production distribution and use of energy causes negative effects Many of these negative effects are not reflected in energy market prices When market failures like this occur there may be a case for government interventions in the form of regulations taxes fees tradable permits or other instruments that will motivate recognition of these external or hidden costs The Hidden Costs of Energy defines and evaluates key external costs and benefits that are associated with the production distribution and use of energy but are not reflected in market prices The damage estimates presented are substantial and reflect damages from air pollution associated with electricity generation motor vehicle transportation and heat generation The book also considers other effects not quantified in dollar amounts such as damages from climate change effects of some air pollutants such as mercury and risks to national security While not a comprehensive guide to policy this analysis indicates that major initiatives to further reduce other emissions improve energy efficiency or shift to a cleaner electricity generating mix could substantially reduce the damages of external effects A first step in minimizing the adverse consequences of new energy technologies is to better understand these external effects and damages The Hidden Costs of Energy will therefore be a vital informational tool for government policy makers scientists and economists in even the earliest stages of research and development on energy technologies

American Book Publishing Record ,2006 *Legal Framework for Strengthening Nuclear Security and Combating Nuclear Terrorism* Igor

Khripunov, Dmitriy Nikonov, 2012 New international approaches to strengthening nuclear security and combating the threat of nuclear terrorism have been introduced throughout the first decade of the 21st century The adoption of new and revised mandatory international legal instruments as well as other non binding initiatives and voluntary mechanisms have led to improved security measures in this critical area but there is still a need for substantive and procedural arrangements to be significantly strengthened This book is a collection of the presentations and deliberations of participants at the NATO Advanced Research Workshop held in Vienna Austria in January 2010 The workshop was attended by over 100 international experts from more than 20 countries and the papers presented here summarize current understanding of and approaches to the legal framework for nuclear security and counterterrorism The book will be of interest to all governments international organizations researchers and practitioners worldwide who are involved in securing nuclear materials and preventing nuclear terrorism
