**The Present Law and Practice Relating to Letters Patent for Inventions (Classic Reprint)** H. Fletcher Moulton, 2016-12-09 Excerpt from *The Present Law and Practice Relating to Letters Patent for Inventions* The English Law of Letters Patent is of the greatest interest both from the legal and the commercial point of view. It was the forerunner and the model of the Patent Laws of all countries in the past; it has greatly helped to build up the commercial supremacy of this Country, and on the certainty and justness of this law and its administration depends to-day the willingness of capital to assist in developing new inventions. But the subject is one whose treatment presents great difficulties to the author, since the majority of the reported decisions really turn on questions of fact. The Courts have quite properly realised this, and the practice of quoting numerous authorities on such questions as subject-matter and infringement has greatly decreased. Nevertheless, the citation of a really apposite decision is often of the greatest value, and the just appreciation of prior decisions is also of great assistance to those who have to advise on questions relating to Letters Patent. I have therefore attempted to give, in a digested and classified form, the decisive points in all such cases as may be likely to be of assistance for either of these purposes. This work presents the law and practice in regard to Letters Patent as it stood at the end of 1912. Although the basic principles of this law have remained unchanged, recent legislation has greatly affected the practice. The Patents Act of 1907 has also introduced many fresh problems for the practitioner, and some of the most important of these, as for example those referring to restrictive conditions in licences, a point to which public attention has been recently called, have not yet had the benefit of judicial elucidation. In such cases, the legal and practical applications of the new provisions have been fully discussed, with a view to assisting those who may have to advise thereon. **English Patent Practice** Henry Cunynghame, 2016-09-19 Excerpt from English Patent Practice With Acts Rules Forms and Precedents Before developing his idea it is in general better not to consult what has been previously done for this often tends to divert the mind and to destroy originality but once the idea is well developed and clear the inventor should make himself master of the principal prior patents connected with it He is certain in this way to find something to avoid and almost as certain to find something which he may carefully adopt in combination with parts of his own proposals In almost every case it is wise to have working models made for small unexpected defects often delay and even defeat the most ingenious inventions About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at [www.forgottenbooks.com](http://www.forgottenbooks.com) This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works
