marketplace This book shows the way Challenges and Opportunities in Healthcare Leadership Angela Lampe, Cindy Costanzo, William Leggio, Timothy C. Guetterman, 2023-01-01 Leaders in healthcare today face many challenges ranging from managing interprofessional teams and teamwork to payment reform to tackling issues such as homelessness and the opioid crisis Leaders have access to depth of information and resources to help them solve these complex and real world problems However it is our belief that given the complexities of healthcare there is value in sharing and learning from those who have first hand experience with interprofessional leadership in healthcare Challenges and Opportunities in Healthcare Leadership Voices from the Crowd in Today's Complex and Interprofessional Healthcare Environment is a volume in a book series titled Contemporary Perspectives in Business Leadership In this book authors share their true authentic reflections and professional stories describing the lived experiences of the author leaders and how the experience changed the author leaders approach as an interprofessional leader Each chapter includes a 1 story about the topic and the lived experience 2 perspectives and 3 lessons of the author's Additionally scholarly commentary and discussion questions included within each chapter create opportunity for application to leadership theories and strategies as well as allow for reflection and further dialogue on the topic The intended audience is broad including faculty and students in institutions of higher education interprofessional healthcare team leaders and members and other healthcare stakeholders who have experience in interprofessional healthcare leadership The book is applicable for leadership growth and development at a personal group or organizational level **Person-centred Health Care** Stephen Buetow, 2016-06-10 Person centred health care is increasingly endorsed as a key element of high quality care yet in practice it often means patient centred health care This book scrutinizes the principle of primacy of patient welfare which although deeply embedded in health professionalism is long overdue for critical analysis and debate It appears incontestable because patients have greater immediate health needs than clinicians and the patient clinician encounter is often recognized as a moral enterprise as well as a service contract However Buetow argues that the implication that clinician welfare is secondary can harm clinicians patients and health system performance Revaluing participants in health care as moral equals this book advocates an ethic of virtue to respect the clinician as a whole person whose self care and care from patients can benefit both parties because their moral interests intertwine and warrant equal consideration It then considers how to move from values including moral equality in health care to practice for people in their particular situations Developing a genuinely inclusive concept of person centred care accepting clinicians as moral equals it also facilitates the coalescence of patient centred care and evidence based health care This reflective and provocative work develops a constructive alternative to the taken for granted principle of primacy of patient welfare It is of interest to students and academics in the health and caring sciences philosophy ethics medical humanities and health management **Implementation of Personalized Precision Medicine** William P.
