## **Patterns Of Bias In Hollywood Movies Patterns Of Bias In Hollywood Movies:**

**Patterns of Bias in Hollywood Movies** John W. Cones, 2012 It is pretty broadly recognized that Hollywood movies contain patterns of bias but it is not just people of color or women who are hurt by this. Many groups within America's multicultural society have complained over the years about negative and stereotypical portrayals of their own group members in motion pictures produced or released through the Hollywood based studios. Yet as an expert on the U.S. film industry points out, such complaints have had little impact on consistent patterns of bias in movies. This book takes a broader look at the nature of negative and stereotypical movie portrayals and tracks patterns of such one-sided depictions over a longer period of time. As a result, the patterns of bias and the source of the problem become more clear. The problem appears to be that most of the people who have green light authority in the U.S. film industry for either the production and/or distribution of a motion picture share a common ethnic, religious, cultural background. Thus, the stories of their cohort and those of all other ethnic, religious, and/or cultural groups whose members seldom achieve positions of power in Hollywood are being filtered through the cultural sensibilities of a single group. John Cones suggests that the solution could lie in increasing diversity at the highest levels in the U.S. film industry. This work grew out of the observed frustration of film industry critics who have pointed out examples of bias and stereotyping in specific movies over the years only to be rebuffed by the simplistic studio arguments that such films reflect the real world and that moviegoers vote with their pocket books. It can be shown that there is a consistent pattern to the choices Hollywood studio executives make with respect to the movies produced and released and the specific content of those movies, and it becomes obvious that Hollywood is selectively portraying reality. Moviegoers only have limited options among all of the possibilities that could be portrayed on the silver screen. This book differs from other studies touching on bias in motion pictures. Most such books focus on the treatment of a single ethnic, religious, cultural, racial, or other readily identifiable interest group, but this study attempts to provide an overview and to identify patterns over time. When the patterns of bias in motion picture content are sufficiently demonstrated and documented, it becomes easier to identify the source of the bias and to explain why such bias exists.

**Motion Picture Biographies** John Cones,2015-04-01 Hollywood movies are famous for promoting negative stereotypes of all kinds especially against minorities women Southerners and Christians To what extent are biographical films selected for production according to certain biases conscious or unconscious among the Hollywood elite An expert on the U S film industry gives readers brief synopses of Hollywood biopics produced and or released from 1912 through 1994 This survey provides the basis for discussion and analysis Tracking these one sided depictions over a longer period of time the patterns of bias and the source of the problem become more clear The problem appears to be that most of the people who have green light authority in the U S film industry for either the production and or distribution of a motion picture share a common ethnic religious cultural background Thus the stories of their own cohort and those of all other ethnic religious and or cultural groups whose members seldom achieve positions of power in Hollywood are being filtered through the cultural sensibilities of a single group John Cones suggests that the solution could lie in increasing diversity at the highest levels in the U S film industry

**Hollywood's America** Stephen P Powers, 2018-02-19 American motion pictures still dominate the world market with an impact that is difficult to measure Their role in American culture has been a powerful one since the 1930s and is a hallmark of our culture today Though much has been written about the film industry there has been very little systematic attention paid to the ideology of its creative elite How does the outlook of that elite impact on the portrayals of America that appear on the screen How do their views interact with the demands of the market and the structure of the industry to determine the product that is seen by mass audiences Hollywood's America is a marvellously rich and careful discussion of these questions It combines a meticulous systematic content analysis of fifty years of top grossing films with a history of the changing structure of the industry To that mixture it adds an in depth survey of Hollywood's creative elite comparing them to other leadership groups The result is a balanced discussion of unique breadth and depth on a subject of national importance Placing the film industry in the context of American society as a whole the authors point out that Hollywood's creative leadership impacts the larger society even as it is influenced by that society The creators of films cannot remove themselves too far from the values of the audiences that they serve However the fact that films are made by a relatively small number of people who as the authors demonstrate tend to share a common outlook means that over time motion pictures have had an undeniable impact on the beliefs lifestyles and action of Americans This study contributes to the debate over the role and influence of those who create and distribute the products of mass culture in the United States The book also contains a devastating critique of the poststructuralist theories that currently dominate academic film criticism demonstrating how they fail in their attempt to explain the political
