Is a loved one missing some body parts
Are blondes becoming extinct
Is everyone at your dinner table of the same species
Humans and chimpanzees differ in only 400 genes is that why a chimp fetus resembles a human being
And should that worry us
There s a new genetic cure for drug addiction is it worse than the disease
We live in a time of momentous scientific leaps a time when it s possible to sell our eggs and sperm online for thousands of dollars and to test our spouses for genetic maladies
We live in a time when one fifth of all our genes are owned by someone else and an unsuspecting person and his family can be pursued cross country because they happen to have certain valuable genes within their chromosomes
Devilishly clever
Next blends fact and fiction into a breathless tale of a new world where nothing is what it seems and a set of new possibilities can open at every turn
Next challenges our sense of reality and notions of morality
Balancing the comic and the bizarre with the genuinely frightening and disturbing
Next shatters our assumptions and reveals shocking new choices where we least expect
The future is closer than you think **Sphere** Michael Crichton, 1988

A page turner
Chichton s writing is cinematic with powerful visual images and nonstop action
This book should come with hot buttered popcorn
NEWSWEEK A group of American scientists are rushed to a huge vessel that has been discovered resting on the ocean floor in the middle of the South Pacific
What they find defines their imaginations and mocks their attempts at logical explanation
It is a spaceship of phenomenal dimensions apparently undamaged by its fall from the sky
And most startling it appears to be at least three hundred years old
The suspense is real
