 in Trusted Systems](#) ,1987 One of the features of the Criteria that is required of a secure system is the enforcement of
 discretionary access control DAC DAC is a means of restricting access to objects based on the identity of subjects and or
 groups to which they belong The controls are discretionary in the sense that a user or process given discretionary access to
 information is capable of passing that information along to another subject This guide discusses issues involved in designing
 implementing and evaluating DAC mechanisms Its primary purpose is to provide guidance to manufacturers on how to select
 and build effective DAC mechanisms DTIC **Computing Fundamentals** Faithe Wempen,2014-11-26 The absolute
