Napoleon S Buttons 17 Molecules Changed History:

Napoleon's Buttons Penny Le Couteur, Jay Burreson, 2004-05-24 *Napoleon's Buttons* is the fascinating account of seventeen groups of molecules that have greatly influenced the course of history. These molecules provided the impetus for early exploration and made possible the voyages of discovery that ensued. The molecules resulted in grand feats of engineering and spurred advances in medicine and law; they determined what we now eat, drink, and wear. A change as small as the position of an atom can lead to enormous alterations in the properties of a substance, which in turn can result in great historical shifts. With lively prose and an eye for colorful and unusual details, Le Couteur and Burreson offer a novel way to understand the shaping of civilization and the workings of our contemporary world. *Napoleon's Buttons* Penny Le Couteur, 2003. Describes seventeen chemical compounds in spices, textile fibers, dyes, explosives, medicines, and other substances, including the drugs that account for witches flying on broomsticks and how they affect civilization. *Napoleon's Buttons*, 2003. *Every Molecule Matters* Simon Cotton, 2025-09-10 *Every Molecule Matters* is a successor to the author's earlier *Every Molecule Tells a Story* and tells the story of a wide range of molecules. These range from the familiar odours that enhance the pleasure of eating and the spices that add piquancy to the vitamins vital to our survival, as well as the ways in which insects and plants use chemicals to protect themselves. There's controversy surrounding the compounds of chlorine, which encompass life-supporting anaesthetics and natural antibiotics, as well as insecticides like DDT, which saved innumerable lives but became an environmental cause célèbre. Through the addictive power of nicotine, smoking tobacco transformed from a curiosity imported from the Americas into a megapound industry that has caused significant human illness and death. And how safe is vaping? Discover the painkillers that have become drugs of abuse and smile at the smelly sulfur compounds that serve as unpleasant human odorants and defence molecules for skunks, control natural cycles in the environment, or act as flavourings in wine. You will discover them all here. This book showcases the structures of hundreds of compounds used by humans, animals, and plants. Some are beneficial, some are not. Find out here why you should be better informed about them. This collection of molecules includes human issues such as the chemistry of vaping and drugs of abuse, including spice nitazenes and fentanyl. Chemistry of Everyday includes vitamins and the molecules that give foods their aromas and appetizing appeal. The chemistry of nature: how plants and insects use chemicals to defend themselves against potential predators, whether humans, birds, animals, or other insects. Organohalogen compounds encompassing the atmosphere-damaging CFCs and their replacements, and the chlorine compounds that are important medicines, e.g. vancomycin. Using isotopes, from archaeologists' faced-by-mysteries of ancient Rome and silver from Spanish conquistadors to tracking down the origin of South American cocaine and solving the Scissor Sister murder case. *Integrating Literature in the Content Areas* Sharon Kane, 2017-05-12 This practical, accessible resource will help future and practicing teachers integrate literature into their middle school or high school classrooms while also addressing content area standards and improving the literacy skills.

Small Things in the

Eighteenth Century Chloe Wigston Smith, Beth Fowkes Tobin, 2022-09-29 Offering an intimate history of how small things were used handled and worn this collection shows how objects such as mugs and handkerchiefs were entangled with quotidian practices and rituals of bodily care Small things from tiny books to ceramic trinkets and toothpick cases could delight and entertain generating tactile pleasures for users while at the same time signalling the limits of the body's adeptness or the hand's dexterity Simultaneously the volume explores the striking mobility of small things how fans coins rings and pottery could for instance carry political philosophical and cultural concepts into circumscribed spaces From the

decorative and playful to the useful and performative such small things as tea caddies wampum beads and drawings of ants negotiated larger political cultural and scientific shifts as they transported aesthetic and cultural practices across borders via nationalist imagery gift exchange and the movement of global goods *Extravagances* Cristina Giorcelli, Paula Rabinowitz, 2015-12-01 This final volume in the four volume series *Habits of Being* shows how the dialectic between everyday appearance and outrageous acts is mediated through clothing and accessories It considers how clothing and accessories can move quickly from the ordinary to the extravagant Employing many different approaches these essays explore how wearing an object a crown a flower an earring a corsage a veil even a length of material can stray beyond the bounds of the body on which it is placed into the discrepant territory of flagrantly excessive public signs of love status honor prestige power desire and display The varied contributions of scholars historians ethnographers literary and film critics and artists photographers sculptors writers weavers and embroiderers take up the threads of these forays into history psyche and aesthetics in surprising and useful ways With examples from around the world contributors address how the simple action of ornamenting the body even with something as common as a button are open to elaborate interpretations which themselves offer new understandings of human behavior and artistic endeavor When our habits of being receive close scrutiny they seem anything but habitual Contributors Mariapia Bobbioli Camilla Cattarulla U of Rome Three Paola Colaiacomo Sapienza U of Rome Maria Damon Pratt Institute of Art Joanne B Eicher U of Minnesota Maria Giulia Fabi U of Ferrara Margherita di Fazio Adeena Karasick Fordham U Tarrah Krajnak Pitzer College Charlotte Nekola William Paterson U Victoria R Pass Maryland Institute College of Art Amanda Salvioni U of Macerata Maria Anita Stefanelli U of Rome Three **Integrating Literature in the Disciplines** Sharon Kane, 2020-04-22 The Second Edition of this practical and comprehensive resource offers a multitude of ways to incorporate literature into teaching and learning across a range of disciplines Future and practicing teachers librarians instructional coaches and school leaders can implement the ideas within this text to improve the literacy skills and knowledge of students while also addressing standards and curricular goals of various content areas The new edition recognizes a paradigm shift from content areas to disciplines reflecting the specific ways reading and writing are used in different fields of study Updated with current research and practices the volume recommends and evaluates books in different genres and categories with chapters on informational books fiction biography and memoir poetry and hands on and how to books For every category Kane provides a rationale instructional strategies and author studies as well as lists and descriptions of books related to curricular areas With a wealth of activities and new BookTalks this Second Edition is greatly revised and features expanded attention to technology digital learning diversity and culture Using this text will create opportunities for deep discussions and will stimulate students interest and motivation to read and learn Integrating Literature in the Disciplines helps educators identify books that fit with any subject to enhance the creative and affective dimensions of school life encourages interdisciplinary connections and increases the depth and relevance of lessons It is ideal
