National Space Legislation In Europe Studies In Space Law:

National Space Legislation in Europe Frans G. von der Dunk, 2011-09-09 The book deals with the main themes in implementing international space law vis vis private enterprise theme by theme with a specific focus on Europe in view of the complicating roles of ESA and the European Union in this context

National Space Legislation in Europe Frans G. von der Dunk, 2011-09-09 The increasing involvement of private enterprise in the conduct of space activities raises key issues with respect to international space law which has left it to national law to implement relevant rules vis vis private enterprise Almost unavoidably such national implementation regimes differ largely across individual states This is also true in Europe where the issue is further compounded by the fundamental but fundamentally different roles of ESA and the European Union Focusing on Europe the present book thus represents the first comprehensive effort to discuss national authorisation schemes not country by country but theme by theme so as to allow for a real comparison of the lack of harmonisation or even coordination and the possible problems which may result

National Space Legislation Annette Froehlich, Vincent Seffinga, 2018-02-16 This book provides a unique in depth comparative and evaluative analysis based upon primary sources Therefore it does not only provide a more complete understanding of the subject compared to other publications but because it provides a full perspective can also serve as a basis for further research The interest in national space legislation and the importance thereof to regulating space activities conducted by private entities gives a clear incentive to conduct a comparative analysis of the national space legislation of various states The purpose of this report is to provide such a comparative analysis that will detail the similarities and differences between the national space laws of selected states with a focus on European comprehensive national space legislation The states discussed are Sweden the United Kingdom Australia China Belgium the Netherlands France Austria Indonesia Denmark New Zealand and Luxembourg This report is intended to assist the efforts of states that are seeking to enact or revise national space legislation not only by presenting the approaches taken by other states but also by presenting as far as possible the rationale behind their approaches The readership of this book consists of academics and professionals in space law and can further assist policymakers wishing to revise or enact national space legislation

Legal Basis for a National Space Legislation Julian Hermida, 2006-04-11 A GENERAL BACKGROUND The foremost goal of the international community in the area of private space launch services should be to induce states to implement effective licensing procedures applicable to commercial ventures for which state responsibility may 1 exist 1 PRIVATE SECTOR PARTICIPATION IN THE SPACE INDUSTRY In the first decades of the space age military and state security motivations indicated the direction of national space programs Now the development of space activities depends essentially upon the possibility of recovering 2 investments Private sector driven commercial endeavors in outer space have been increasing exponentially and have experienced a significant quantitative growth over the last years Spacefarers promote commercial participation of private companies in operations related to outer space and thus the private

sector is now increasingly providing satellite telecommunications remote sensing global positioning and space launch services directly to its customers In this context overall revenues for the worldwide space industry 3 amounted to US 82 billion in 2001 In the late 1990 s the transponder demand in particular Ku band transponders was consistently on the rise due 4 to the escalated utilization of geostationary satellite transponders Global positioning systems have been playing an increasingly important role in navigation and remote sensing systems are mapping and documenting nearly 1 E A Frankle E J Steptoe Legal Considerations Affecting Commercial Space Launches From International Territory 1999 50 IISL at 10 Emphasis added 2 H L

Space Insurance: International Legal Aspects Katarzyna Malinowska, 2017-03-15 Insurance related to outer space activities has been around since the 1960s but has become vastly more significant with the increased commercial use of satellites This book focuses on the legal aspects of space insurance in the contractual context analysing space risk as well as the insurance terms used on the market It offers the first in depth coverage both practical and theoretical of space insurance from an international law perspective Attending throughout to the important and problematic distinction between the space segment upstream and ground segment downstream in space law this book deals comprehensively with such issues and topics as the following the main hazards relating to space activities the impact of new space technologies on the level of risk and insurance the differing types of risks attributable to various entities in the context of insurable interest aspects of the space risk allocation regimes and risk assessment the impact of the five space treaties the Outer Space Treaty the Liability Convention the Rescue Agreement the Registration Convention and the Moon Agreement on the subject and scope of insurance coverage the advent of suborbital flight commercial human space flight and space tourism in the context of emerging insurance risks the problem of space debris contractual aspects of space activities affecting the space insurance risks basic notions such as outer space space object in the context of space activities and related insurance coverage basic insurance principles and their operation in the space insurance and the adjustment of losses and the settlement of disputes in space insurance The author emphasises the need to understand the various insurance risks facing particular types of commercial space activities including pre launch launch transportation spaceflight satellite communications satellite navigation satellite remote sensing and space station operation Satellites are increasingly a vital part of many daily activities of contemporary society and the Earth s orbit is becoming ever more crowded heightening the risks of collision damage and claims This thoroughly researched book will therefore be extremely useful to lawyers policymakers and academics tasked with defining the scope of insurance coverage that accurately mirrors technological contractual and legal reality Its practical aspect will be of extraordinary value to insurance lawyers underwriters and brokers
