Abstract

Personal, social, cultural, economic, and political factors influence the language/s used by family members in the home domain. This study examines how family language policies are planned and developed in Filipino-Malaysian families in Malaysia. The language used at home in such mixed or exogamous marriages is also influenced by the ethnicity of the Malaysian spouse. Exposure outside the home domain where people speak at least two languages also affects language choice and use. An ethnographic method that includes multiple interviews, participants' narratives, and observations were used in gathering the data. Thirty (30) Filipino-Malaysian families were the subjects of this study. Communication Accommodation Theory (CAT) is used as the theoretical framework to explain the occurrence of language choice in the home domain and the creation of family language policy. CAT shows how families accommodate each other's language as they seek a lingua franca that binds the family together. The findings of the study would explain the complex phenomenon involved in language choice and the creation of family language policy of Filipino-Malaysian families.

Introduction

The family plays a vital role in the maintenance and preservation of ethnic minority languages when an individual decides to marry a foreigner and/or migrate to a foreign land where the language of the majority differs from one's native language. Deciding which language would be the lingua franca and eventually the language of socialization of the offspring is a major challenge to parents of mixed marriages from different linguistic backgrounds. Thus, a family language policy is co-constructed by the spouses to carry out the dual functions of making one native language the lingua franca while preserving the other native language for other purposes. Alternatively, the family could decide that a common language be made the lingua franca while both native languages are preserved for other purposes. The emerging field of family language policy (FLP, hereafter) 'provides an integrated overview of research on how languages are maintained, learned and negotiated within families' (King, Fogle and Logan-Terry 2008, 907). Parents are thus faced with the challenge of having to decide whether the minority language is maintained and learned by their children or opt for a common language that may not be the mother tongue of either parent but the language of the majority of the speech community (cf. Schwartz 2010). This
