Oxford English Guide 7th:

The Cambridge Companion to Old English Literature Malcolm Godden, Michael Lapidge, 2013-05-02 This updated edition has been thoroughly revised to take account of recent scholarship and includes five new chapters

A Guide To Grammar and Usage for Psychology and Related Fields John Eric Bellquist, 2014-01-27 Why another book on this topic The author's experience editing leading journals in psychology suggests that publication manuals and books on writing about experimentation in psychology do not adequately address grammatical usage and style Much of the advice published for scientific writers reads as if it had been written either by English teachers for writers who do not publish in scientific fields or by scientific writers who think that the information already available in countless handbooks on grammar and style for student writers in English classes is enough Unfortunately such traditional handbooks do not offer the particular sorts of commentary that scientific writers need This book offers specific advice on a host of issues ranging from the appropriate use of abbreviations to wordiness and how to avoid it Dr Bellquist's expertise in both the English language and the language of scientific writing ideally positions him to offer guidelines on the use of the passive the best wording for statistical presentations and just how to describe experimental procedures among many other topics Complete with examples and principles to guide writing decisions this book will assist both students and seasoned professionals in presenting their work clearly for maximum impact This book is intended as a guide to grammar and usage for writers in scientific fields particularly in experimental psychology and all fields related to experimental psychology Features of the book include alphabetical entries and numerous cross references on grammar usage and style numerous examples taken from scientific papers or based on actual cases discussions of semantic problems of grammar such as modification predication and statement and discussions of usage specific to experimental psychology statistics and related fields
