Handbook proposes a novel classification system for researchers in human rationality and it creates new connections between rationality research in philosophy psychology and other disciplines Following the basic distinction between theoretical and practical rationality the book first considers the theoretical side including normative and descriptive theories of logical probabilistic causal and defeasible reasoning It then turns to the practical side discussing topics such as decision making bounded rationality game theory deontic and legal reasoning and the relation between rationality and morality Finally it covers topics that arise in both theoretical and practical rationality including visual and spatial thinking scientific rationality how children learn to reason rationally and the connection between intelligence and rationality **Legal**

**Histories of Empire** Lyndsay Campbell,Shaunnagh Dorsett,2024-10-11 This collection brings together an international group of scholars in order to provide new insights into the diversity of imperial legalities Across empires legalities were produced not just or even through the imperial imposition of laws and legal forms but through local processes of negotiation and contestation Far from the metropolises local actors found ways to creatively navigate and subvert imperial frameworks and laws and to create space in which to shape new legalities responsive to local circumstance and need Covering topics as diverse as smuggling in eighteenth century Jersey the criminalisation of female market women in World War II era southern Nigeria and whiteness and race in sexual perversion cases in twentieth century Malaya the collection elaborates new legal histories of empire Drawing from Britain Ireland Australia Canada the USA India Sri Lanka Africa and Malaysia the collection brings together chapters that examine the stories of the peoples of empires and shows how they constituted experienced navigated and subverted the legal complexities of living under empire This book will be of interest to scholars and researchers in law and history but also to those with relevant interests in post colonial and cultural studies as well as in criminology and sociology *Homicide and the Politics of Law Reform* Jeremy Horder,2012-07-12 What makes murder murder How should we understand the difference between intentional and reckless killing Should offenders be punished differently according to the perceived severity of their crime and when should they be excused These questions are the topic of intense debate within legal circles and beyond in the UK the US and the rest of world Jeremy Horder s role as the Law Commissioner for England and Wales on criminal law has given him unique insight into these questions and the debates surrounding them Here he analyses the recent political and legal reform movements offering a political history of homicide law reform from the 19th century to the modern era Using homicide as a starting point Horder raises deeper questions of who is and should be responsible for making and changing the law What role should there be for expert bodies judges and politicians What role should there be for the general public These questions invoke strong emotional responses Horder argues that comprehensive research into and a degree of difference to public opinion on the scope of homicide is essential to the reform process It is essential principally as a means of conferring true legitimacy on homicide reform in a democracy Elite or expert opinion alone will never authentically secure such legitimacy Offering an insider s view into the processes of

achieving law reform Horder expresses criticism of a system that excludes the vast majority of people from consultation on reform of the laws that govern them **A Treatise of Legal Philosophy and General Jurisprudence** Gerald J.

Postema,2011-08-05 Volume 11 the sixth of the historical volumes of A Treatise of Legal Philosophy and General Jurisprudence offers a fresh philosophically engaged critical interpretation of the main currents of jurisprudential thought in the English speaking world of the 20th century It tells the tale of two lectures and their legacies Oliver Wendell Holmes Jr s The Path of Law 1897 and H L A Hart s Holmes Lecture Positivism and the Separation of Law and Morals 1958 Holmes s radical challenge to late 19th century legal science gave birth to a rich variety of competing approaches to understanding law and legal reasoning from realism to economic jurisprudence to legal pragmatism from recovery of key elements of common law jurisprudence and rule of law doctrine in the work of Llewellyn Fuller and Hayek to root and branch attacks on the ideology of law by the Critical Legal Studies and Feminist movements Hart simultaneously building upon and transforming the foundations of Austinian analytic jurisprudence laid in the early 20th century introduced rigorous philosophical method to English speaking jurisprudence and offered a reinterpretation of legal positivism which set the agenda for analytic legal philosophy to the end of the century and beyond A wide ranging debate over the role of moral principles in legal reasoning sparked by Dworkin s fundamental challenge to Hart s theory generated competing interpretations of and fundamental challenges to core doctrines of Hart s positivism including the nature and role of conventions at the foundations of law and the methodology of philosophical jurisprudence **Lawyers and Fidelity to Law**

W. Bradley Wendel,2012-08-26 Even lawyers who obey the law often seem to act unethically interfering with the discovery of truth subverting justice and inflicting harm on innocent people Standard arguments within legal ethics attempt to show why it is permissible to do something as a lawyer that it would be wrong to do as an ordinary person But in the view of most critics these arguments fail to turn wrongs into rights Even many lawyers think legal ethics is flawed because it does not accurately describe the considerable moral value of their work In Lawyers and Fidelity to Law Bradley Wendel introduces a new conception of legal ethics that addresses the concerns of lawyers and their critics alike Wendel proposes an ethics grounded on the political value of law as a collective achievement that settles intractable conflicts allowing people who disagree profoundly to live together in a peaceful stable society Lawyers must be loyal and competent client representatives Wendel argues but these obligations must always be exercised within the law that constitutes their own roles and confers rights and duties upon their clients Lawyers act unethically when they treat the law as an inconvenient obstacle to be worked around and when they twist and distort it to help their clients do what they are not legally entitled to do Lawyers and Fidelity to Law challenges lawyers and their critics to reconsider the nature and value of ethical representation **Comparing Law**

Catherine Valcke,2018-10-25 The enterprise of comparative law is familiar yet its conceptual whereabouts remain somewhat obscure Comparing Law Comparative Law as Reconstruction of Collective Commitments reconstructs comparative law

scholarship into a systematic account of comparative law as an autonomous academic discipline. The point of that discipline is neither to harmonize world law nor to emphasize its cultural diversity but rather to understand each legal system on its own terms. As the proposed reconstruction exercise involves bridging comparative law and contemporary legal theory, it shows how comparative law and legal theory both stand to benefit from being exposed to each other. At a time when many courses are adding a transnational perspective, Valcke offers a more theoretical, broadened and refreshed view of comparative law.
