Children's Palliative Care: An International Case-Based Manual Julia Downing, 2020-04-01 This manual enables individuals working in children's palliative care CPC globally to learn through engaging real world cases The aim is to provide a clinical case based resource that is globally relevant and accessible to those working in CPC Drawing on case histories from around the world that reflect key issues and elements of CPC it provides a practical approach grounded in experience It addresses multidisciplinary care in the management of children and their families discusses cases from an

international perspective and shares examples from a variety of countries utilising cases across a range of ages and conditions demonstrating holistic care. It represents the first case based manual on global CPC and is endorsed and promoted by the International Children's Palliative Care Network (ICPCN). Children's palliative care is a rapidly developing field both in the UK and internationally. The provision of CPC varies considerably with provision often being insufficient and over 65% of countries having no recognised CPC service provision whatsoever. As such, while there are an estimated 21.6 million children who require palliative care in many areas of the world, CPC is poor or non-existent and children are treated like little adults without their distinctive needs being recognised or understood. There is also a dearth of literature on CPC; hence this clinical case based manual fills a gap in the market and is aimed at a global audience, making it a unique text in the field.

Protocolos de urgencia em Pediatria Manuela Correia, 2012-11-28. Este livro inclui mais de 140 protocolos de urgencia em Pediatria convenientemente divididos por áreas. A terceira edição foi atualizada e todos os protocolos foram reformulados. Os protocolos estão divididos por 16 capítulos que cobrem todas as áreas da urgencia pediátrica desde a reanimação e falência de órgão até urgencias de adolescentes: cardiológicas, cirúrgicas, dermatológicas, endócrinas, gastroenterológicas, hematológicas, infecciosas, metabólicas, nefrológicas, neonatais, neurológicas, respiratórias e trauma. Inclui ainda um capítulo sobre procedimentos. Onze anos depois da 1ª edição depositamos agora nas vossas mãos a 3ª edição do Livro Azul dos Protocolos de Urgencia em Pediatria. Nestes anos deixou de ser uma referência local, expandiu-se de norte a sul do país e chegou mesmo aos PALOPs. Já vão longe os primeiros passos deste livro. Agora quase adolescente cresceu muito: dos 98 protocolos iniciais passou a ter agora 142. O objectivo continua a ser como no princípio: facultar sobretudo aos jovens médicos na área da Pediatria uma ferramenta de consulta fácil, com informação resumida e filtrada que lhes possa ser útil nas circunstâncias especialmente difíceis e muitas vezes angustiantes da urgencia. Não pode contudo deixar de ser realçado que a Medicina não se exerce por decreto e que por isso nunca devem os protocolos ser encarados como um dogma. Constituem orientações gerais que terão necessariamente de ser adaptadas a cada doente concreto, pois como todos sabemos os doentes não vêm nos livros. O conhecimento médico tem aumentado de forma exponencial, o que nos obriga a um esforço sempre acrescido de separar o essencial do acessório. Esse foi o desafio que colocamos aos colaboradores desta edição: especialistas nos vários temas abordados. A todos agradecemos a forma competente e entusiástica como participaram. Esperamos que continue a ser o instrumento útil que tem sido e aguardamos os comentários, críticas e sugestões dos leitores para que a próxima edição

possa preencher ainda mais as necessidades daqueles a quem se destina
