Matiti, Lesley Bailey, 2020-12-17 Dignity in the care of patients and clients of all ages whether in hospital or community settings is an area of increasing national and international importance and concern. However, a comprehensive accessible resource for nurses and midwives on the theory and practice of dignity in care has until now been lacking. Dignity in Healthcare provides a practical approach underpinned by up to date theory to this crucial issue for those providing care to people in all stages of life including those with mental illnesses or learning disabilities. Care in areas such as maternity, community, palliative and acute care and others is explored in depth. Approaches to education and practice development for promoting dignity in care are also outlined clearly and accessibly with each chapter combining an evidence based theoretical underpinning with practical application through scenarios. Pre registration nursing and midwifery students and their teachers will find this book essential reading but it will also be of interest to practising nurses, midwives and other health professionals seeking clear insights into the principle of care that is central to all healthcare professions. **CureAll framework**

, 2021-10-28 This framework document is a how to guide for policy makers and programme managers to effectively implement the CureAll pillars and enablers. It provides justification for action, posits priority interventions and proposes a monitoring framework. Key components needed to establish scale up and sustain a well functioning national childhood cancer programme are explained. The scope of this framework document is centrally defined by the programmes, services and policies that support children with cancer in the context of the health system. For the Initiative, children are defined as those aged 19 years or younger. Childhood cancer care requires cross cutting strategies such as workforce training that often have overlap with broader child health and/or cancer control programmes. These synergies are highlighted and considered in scope for the Initiative and for an integrated response in childhood cancer control. The primary audience for this framework document are policy makers, cancer control programme managers and hospital managers at the country level. Additional key stakeholders may also find the information in this guide beneficial including clinicians, parent groups, civil society, academia and interested parties in the private sector. Nursing Skills for Children and Young People's Mental Health

Laurence Baldwin, 2019-08-02 This book focuses on those nursing skills that are truly valued and needed by children and young people with mental health problems. Whilst other books have chiefly focused on mental health conditions and treatments, this book moves away from this formulaic approach and considers what children and youth themselves need most from health professionals. It shows why nursing skills are among the most precious values for patients. This focus on therapeutic relationships, establishing trust based forms of nursing and empowering children and young people to develop into healthy and resilient young adults has largely been neglected despite the feedback from those who urgently need help but often struggle to find it or are wary of

seeking help and reluctant to engage This book focuses on the places where nurses encounter young people and seek to help them It examines the role nurses play in specialist child and adolescent mental health settings such as inpatient and community as psychotherapists and on self harm teams and where paediatric nurses work with troubled young people in emergency departments paediatric wards and primary care It also considers two specific areas namely eating disorder services and consent seeking that could benefit from nursing skills that are currently undervalued but are in fact invaluable Its focus on those skills that nurses already have but may not be consciously using will make this book uniquely appealing to all nurses who work with children and young people with mental health problems regardless of the setting and an essential guide for students and experienced professionals alike

Developing Nursing Practice with Children and Young People Jane Hughes, Geraldine Lyte, 2015-09-08 Developing Nursing Practice with Children and Young People explores the context of children's nursing in light of recent policy changes and looks at contemporary issues and emerging roles within the field Divided into four parts Part One focuses on the emergence of children's nursing in healthcare detailing events and developments that have shaped the role of children's nurses Part Two examines many aspects of practice for registered practitioners in nursing ranging from acute care settings to children's nurses developing roles in primary care mental health and with children and young people with special health and social needs Part Three then provides a detailed analysis of advanced practice in children's nursing The advanced skills portfolio is presented in depth augmented by exemplars of a number of advanced practice roles which have already been established Finally Part Four builds on the previous three parts by offering several case studies from practice including accounts from children young people and families as well as assistant practitioners and student nurses The text concludes by focusing on the longer term scope for children's nurses

Children and Young People's Nursing Alyson M. Davies, Ruth E. Davies, 2016-10-03 Underpinned by a rights based approach this essential text critically analyses the theory and practice of children and young people's nursing from several perspectives public health acute and community based care education and research Chapters address the clinical legal ethical political and professional issues and controversies which impact on the care delivered to children young people and their families both nationally and internationally This new edition continues to promote reflection and critical thinking about the practice of children's nursing and professional development
