*The Modern Urban Landscape* E. C. Relph, 1987-08 Why do the cities of the late twentieth century look as they do What values do their appearance express and enfold Their sheer scale and the durability of their materials assure that our cities will inform future generations about our era in the same way that gothic cathedrals and medieval squares tell us something of the Middle Ages In the meantime our urban landscapes can tell us much about ourselves For E C Relph the urban landscape must be envisioned as a total environment not just streets and buildings but billboards and parking meters as well The Modern Urban Landscape traces the developments since 1880 in architecture technology planning and society that have formed the visual context of daily life Each of these shaping influences is often viewed in isolation but Relph surveys the ways in which they have operated independently to create what we see when we walk down a street shop in a mall or stare through a windshield on an expressway Two sets of ideas and fashions Relph argues have had an especially important impact on urban landscapes in the twentieth century An internationalism made possible by new building technologies and more rapid communications has replaced regional style and custom as the dominant feature of city appearance while a firm belief in the merits of self consciousness has imposed logical analysis and technical manipulation on such commonplace objects as curbstones and park benches As a result writes Relph the modern urban landscape is both rationalized and artificial which is another way of saying that it is intensely human

**Cyclopedia of Painters and Paintings** John Denison Champlin, Charles Callahan Perkins, 1905      **Archaeological Perspectives on Contested and Political Landscapes** Eduardo Herrera Malatesta, 2025-10-01 This book focuses on alternative definitions of landscape in archaeology particularly those that explicitly address landscapes political aspects In doing so this volume emphasizes the non static dialogic nature of landscape within a community and acknowledges how a community s composition and its relationship with the landscape can lead to tensions and even violent conflicts with other groups It highlights the relevance of considering movement borders and conflict as sources for understanding how people create their own landscapes and how they reshape them in times of political conflict For example in contexts of colonization and war people are forced to adapt to new politics and hierarchies as they see their personal and communal understanding of the world deeply transformed something visible even today as political tensions constantly reshape local and global landscapes Understanding how landscapes were created and contested in the past is essential for understanding their political economic and cultural manifestations in the present in order to better organize ourselves for a truly integrative future
