Theology in Motion Aimee Allison Hein,2024-11-19 Christian responses to global migration are as loud as they are numerous With voices evoking either the injunction to love the stranger or a commitment to the rule of law this polarized cacophony has become yet another theater in the culture war But migration is not an idea It is not an abstraction Migration is about people present in our midst or encountered at our edges Their presence at our borders forces us to consider the core values we want most to uphold and the stories that taught us those values in the first place In the United States our most popular origin stories tell of a nation that fought off tyranny and committed itself to liberty democracy and the dream of an unencumbered pursuit of happiness of a life lived on one s own terms But is this the whole story Whose perspectives have shaped the stories we tell and which perspectives have been ignored **Theology in Motion** tracks the story of the United States how it formed and how it came to dominate the land that now rests between its borders to consider more fully what type of nation the US has been and the type of global neighbor it has chosen to be From a Christian moral perspective this history helps us look to the future by analyzing how our past choices have left us with present responsibilities Taking these responsibilities seriously and pursuing more just global relationships provides a way forward in which all people might participate and to which Christians are called

Free Trade for the Americas? Marianne Wiesebron,Paolo Vinentini,2013-07-18 The face of international trade is continuing to change rapidly But while much

attention is focused on where post Cancun any new international negotiations under the auspices of the WTO may go there are other developments of potentially equal importance The United States in particular is prioritizing new regional trade agreements This book focuses on the most ambitious of these negotiations the Free Trade Area of the Americas Agreement which is due to be completed in 2005 This US initiative aims to replicate the NAFTA Agreement which has bound the US Canada and Mexico into a free trade area since 1994 across all 34 countries of South and North America bar Cuba This huge continental market is to be built around US defined notions of free trade and protection of foreign investment but will exclude the free movement of labour This volume explains the origins and process of the negotiations both the complicated multilateral discussions and the bilateral agreements that have already been drafted It explains in detail US strategy The structures and procedures of the Agreement The possible consequences for South America including Mercosur Brazil as Latin America s largest economy and the region s many small economies which cannot possibly compete on a level playing field with the US behemoth The wider implications of the FTAA for the global trading system in particular for China Japan and the EU This book the first comprehensive in depth study of the FTAA will be of use to trade specialists international economists and all those interested in the FTAA about which very little information is readily available in the public domain

offers for the first time a comprehensive analysis of the classic doctrines and main areas of international law from a European perspective meeting the needs of the many European law schools teaching public international law in English. Special attention is devoted to the practice of the European Union, the Council of Europe and European States, both civil law and common law countries with regard to international law. In particular, the book analyses the interplay between international law, EU law and national law in the case law of the Court of Justice of the EU, the European Court of Human Rights and national jurisdictions in Europe. It provides the reader with insights into how the international legal practice of the EU and its Member States impacts the development of international law, both in terms of doctrines such as treaty making and customary law, the exercise of extraterritorial jurisdiction, state responsibility and the settlement of disputes, as well as particular sub-fields of international law such as human rights law and international economic law. In addition, the book covers other important areas such as the use of force and collective security, the law of armed conflict and global and regional international organisations. It provides European perspectives on all these issues and will be of great value to students, scholars and practitioners.
