Narrative And Consciousness Literature Psychology And The Brain:

Narrative and Consciousness Gary D. Fireman, 2003 The evocation of narrative as a way to understand the content of consciousness has sparked truly interdisciplinary work among psychologists philosophers and literary critics The research presented in this volume should appeal to the general reader and researchers enmeshed in these problems

Narrative and Consciousness Gary D. Fireman, Ted E. McVay, Owen J. Flanagan, 2003-06-12 We define our conscious experience by constructing narratives about ourselves and the people with whom we interact Narrative pervades our lives conscious experience is not merely linked to the number and variety of personal stories we construct with each other within a cultural frame but is subsumed by them The claim however that narrative constructions are essential to conscious experience is not useful or informative unless we can also begin to provide a distinct organized and empirically consistent explanation for narrative in relation to consciousness Understanding the role of narrative in determining individual and collective consciousness has been elusive from within traditional academic frameworks This volume argues that addressing so broad and complex a problem requires an examination from outside our insular disciplinary framework Such an open examination would be informed by the inquiries and approaches of multiple disciplines Recognition of the different approaches to examining personal stories will allow for the coordination of how narrative seems its phenomenology with what mental labor it does its psychology and how it is realized its neurobiology Only by overcoming the boundaries erected by multiple theoretical and discursive traditions can we begin to comprehend the nature and function of narrative in consciousness Narrative and Consciousness brings together essays by exceptional scholars and scientists in the disciplines of literary theory psychology and neuroscience to examine how stories are constructed how stories structure lived experience and how stories are rooted in material reality the human body The specific topics addressed include narrative in the development of conscious awareness autobiographical narrative fiction and the construction of self trauma and narrative disruptions narrative memory and identity and the physiological and neural substrate of narrative It is the editors hope that the multidisciplinary nature of this collection will challenge the reader to move beyond disciplinary confines and toward a coherent interdisciplinary dialogue

Body, Soul, and Human Life (Studies in Theological Interpretation) Joel B. Green, 2008-07-01 Are humans composed of a material body and an immaterial soul This view is commonly held by Christians yet it has been undermined by recent developments in neuroscience Exploring what Scripture and theology teach about issues such as being in the divine image the importance of community sin free will salvation and the afterlife Joel Green argues that a dualistic view of the human person is inconsistent with both science and Scripture This wide ranging discussion is sure to provoke much thought and debate Bestselling books have explored the relationship between body mind and soul Now Joel Green provides us with a biblical perspective on these issues

Autobiography and the Psychological Study of Religious Lives , 2008-01-01 This volume positions itself on the cutting edge of two fields in psychology that enjoy rapidly

increasing attention both the study of human lives and some core domains of such lives as religion and spirituality are high on the agenda of current research and teaching Biographies and autobiographies are being approached in new ways and have become central to the study of human lives as an object of research and a preferred method for obtaining unique data about subjective human experiences Ever since the beginning of the psychology of religion autobiographies have also been pointed out as an important source of information about psychic processes involved in religiosity In this volume a number of leading theoreticians and researchers from Europe and the USA try to bring them back to this field by drawing on new insights and latest developments in psychological theory Digital Storytelling Joe Lambert,Brooke Hessler,2018-05-04 In this revised and updated edition of the StoryCenter s popular guide to digital storytelling StoryCenter founder Joe Lambert offers budding storytellers the skills and tools they need to craft compelling digital stories Using a Seven Steps approach Lambert helps storytellers identify the fundamentals of dynamic digital storytelling from conceiving a story to seeing assembling and sharing it Readers will also find new explorations of the global applications of digital storytelling in education and other fields as well as additional information about copyright ethics and distribution The book is filled with resources about past and present projects on the grassroots and institutional level including new chapters specifically for students and a discussion of the latest tools and projects in mobile device based media This accessible guide s meaningful examples and inviting tone makes this an essential for any student learning the steps toward digital storytelling *The Routledge Companion to Hermeneutics* Jeff Malpas,Hans-Helmuth Gander,2014-11-20 Hermeneutics is a major theoretical and practical form of intellectual enquiry central not only to philosophy but many other disciplines in the humanities and social sciences With phenomenology and existentialism it is also one of the twentieth century s most important philosophical movements and includes major thinkers such as Heidegger Gadamer and Ricoeur The Routledge Companion to Hermeneutics is an outstanding guide and reference source to the key philosophers topics and themes in this exciting subject and is the first volume of its kind Comprising over fifty chapters by a team of international contributors the Companion is divided into five parts main figures in the hermeneutical tradition movement including Heidegger Gadamer and Ricoeur main topics in hermeneutics such as language truth relativism and history the engagement of hermeneutics with central disciplines such as literature religion race and gender and art hermeneutics and world philosophies including Asian Islamic and Judaic thought hermeneutic challenges and debates such as critical theory structuralism and phenomenology **Encyclopedia of Media and Communication** Marcel Danesi,2013-01-01 The first comprehensive encyclopedia for the growing fields of media and communication studies the Encyclopedia of Media and Communication is an essential resource for beginners and seasoned academics alike Contributions from over fifty experts and practitioners provide an accessible introduction to these disciplines most important concepts figures and schools of thought from Jean Baudrillard to Tim Berners Lee and podcasting to Peircean semiotics Detailed and up to date the Encyclopedia of Media and Communication synthesizes a wide array of works and

Disrupted Intersubjectivity Andrei Ionescu, 2020-05-14 Disrupted Intersubjectivity investigates two classes of phenomena creating failures of understanding in social interaction referred to as paralysis and invasion Both can be understood as disrupted forms of intersubjectivity the former being characterized by a lack deficiency of ways of relating to others and the latter by an unnecessary surplus By studying the literary accounts of these phenomena in a selection of Ian McEwan's literary works *Homemade On Chesil Beach Enduring Love and Atonement* Andrei Ionescu sheds light on the epistemological potential of literature and the structure of human relationships in general Part of the developing field of cognitive literary studies Disrupted Intersubjectivity not only uses cognitive scientific theories in order to clarify literary issues but also investigates to what extent can literature itself contribute to the process of understanding the workings of the human mind By investigating the metacognitive issues staged and reflected upon in literary works Ionescu challenges and refines contemporary cognitive and philosophical approaches to intersubjectivity and opens directions for further theoretical and empirical research

Cognitive Approaches to Old English Poetry Antonina Harbus, 2012 Offers an entirely new way of interpreting and examining Anglo Saxon texts via theories derived from cognitive studies A major thoughtful study applying new and serious interpretative and critical perspectives to a central range of Old English poetry Professor John Hines Cardiff University Cognitive approaches to literature offer new and exciting ways of interpreting literature and mentalities by bringing ideas and methodologies from Cognitive Science into the analysis of literature and culture While these approaches are of particular value in relation to understanding the texts of remote societies they have to date made very little impact on Anglo Saxon Studies This book therefore acts as a pioneer mapping out the new field explaining its relevance to Old English Literary Studies and demonstrating in practice its application to a range of key vernacular poetic texts including *Beowulf The Wanderer* and poems from the Exeter Book Adapting key ideas from three related fields Cognitive Literary Cultural Studies Cognitive Poetics and Conceptual Metaphor Theory in conjunction with more familiar models derived from Literary Analysis Stylistics and Historical Linguistics allows several new ways of thinking about Old English literature to emerge It permits a systematic means of examining and accounting for the conceptual structures that underpin Anglo Saxon poetics as well as fuller explorations at the level of mental processing of the workings of literary language in context The result is a set of approaches to interpreting Anglo Saxon textuality through detailed studies of the concepts mental schemas and associative logic implied in and triggered by the evocative language and meaning structures of surviving works ANTONINA HARBUS is Professor in the Department of English at Macquarie University Sydney Australia

Revisiting Loss Wojciech Drąg,2014-07-03 Loss is the core experience which determines the identity of Kazuo Ishiguro s narrators and shapes their subsequent lives Whether a traumatic ordeal an act of social degradation a failed relationship or a loss of home the painful event serves as a sharp dividing line between the earlier meaningful past and the period afterwards which is infused with a sense of lack dissatisfaction and nostalgia Ishiguro s narrators have been unable to confine their loss to the past and remain preoccupied by its legacy which ranges from suppressed guilt to a keen sense of failure or disappointment Their immersion in the past finds expression in the narratives which they weave in order to articulate justify or merely understand their experiences Their reconstructions of the past are interpreted as exercises in misremembering and self deception which enable them to sustain their illusions and save them from despair Revisiting Loss is the first book length study of memory encompassing Ishiguro s entire novelistic output It adopts a highly interdisciplinary approach combining a selection of philosophical Jacques Derrida Paul Ricoeur and Jean Starobinski and psychological perspectives Sigmund Freud Frederic Bartlett Jacques Lacan and Daniel L Schacter The book offers a thoroughly researched critical survey drawing on all published critical monographs and collections of academic articles on Ishiguro s work

Imitation and Education Bryan R. Warnick, 2009-01-08 Brings together current research in philosophy cognitive science and education to uncover and criticize the traditional assumptions of how and why we should learn through imitation

Handbook of Philosophy of Management Cristina Neesham, Markus Reihlen, Dennis Schoeneborn, 2022-12-01 The Handbook of Philosophy of Management addresses the philosophical foundations of management in theory and practice It covers established branches of philosophy such as aesthetics epistemology moral philosophy political and social philosophy philosophy of education philosophy of practice and philosophy of science The

Handbook's broad scope maps out the field and provides a forum where philosophy can be meaningfully applied to the study of management in all its forms. The original peer-reviewed research published here sheds new light on the complexities of management theory and practice beyond what hitherto has been possible with the sole application of the social sciences. As philosophy provides a meta-framework for moving beyond paradigm fragmentation within management research and education, this allows researchers and practitioners to find harmony and discord in the perspectives revealed by a philosophical lens.

Visual Representations of the Arctic Markku Lehtimäki, Arja Rosenholm, Vlad Strukov, 2021-03-30
Privileging the visual as the main method of communication and meaning-making, this book responds critically to the worldwide discussion about the Arctic and the North, addressing the interrelated issues of climate change, ethics, and geopolitics. A multi-disciplinary, multi-modal exploration of the Arctic, it supplies an original conceptualization of the Arctic as a visual world encompassing an array of representations, imaginings, and constructions. By examining a broad range of visual forms, media, and forms such as art, film, graphic novels, maps, media, and photography, the book advances current debates about visual culture. The book enriches contemporary theories of the visual, taking the Arctic as a spatial entity and also as a mode of exploring contemporary and historical visual practices, including imaginary constructions of the North. Original contributions include case studies from all the countries along the Arctic shore, with Russian material occupying a large section due to the country's impact on the region.

Science Communication and Trust Antoinette Fage-Butler, Loni Ledderer, Kristian H. Nielsen, 2025-03-26
This open-access book presents groundbreaking research offering new empirical findings showcasing a range of different methods and advancing theoretical perspectives relating to science communication and trust. The investigation of science communication and trust is enhanced by the many international scholars and disciplinary approaches featured. The book includes three thematic sections: the first focuses on the role of trustworthy science communicators; the second is concerned with the varying contexts of science communication for trust; while the third unpacks various features of trust in science. The volume thus provides the reader with invaluable insights into the highly salient topic of science communication and trust.
