The Limits of Nationalism Chaim Gans, 2003-02-13 A radical new perspective on the demands made in the name of cultural nationalism **British Jewry, Zionism, and the Jewish State, 1936-1956** Stephan Wendehorst, 2012 Stephan E C Wendehorst explores the relationship between British Jewry and Zionism from 1936 to 1956 a crucial period in modern Jewish history encompassing both the shoah and the establishment of the State of Israel He attempts to provide an answer to what at first sight appears to be a contradiction the undoubted prominence of Zionism among British Jews on the one hand and its diverse expressions ranging from aliyah to making a donation to a Zionist fund on the other Wendehorst argues that the ascendancy of Zionism in British Jewry is best understood as a particularly complex but not untypical variant of the 19th and 20th century s trend to re imagine communities in a national key He examines the relationship between British Jewry and Zionism on three levels the transnational Jewish sphere of interaction the British Jewish community and the place of the Jewish community in British state and society The introduction adapts theories of nationalism so as to provide a framework of analysis for Diaspora Zionism Chapter one addresses the question of why British Jews became Zionists chapter two how the various quarters of British Jewry related to the Zionist project in the Middle East chapter three Zionist nation building in Britain and chapter four the impact of Zionism on Jewish relations with the larger society The conclusion modifies the

original argument by emphasising the impact that the specific fabric of British state and society in particular the Empire had on British Zionism

The Rise and Fall of the German Democratic Republic Feiwel Kupferberg, Most public debate on reunited Germany has emphasized economic issues such as the collapse of East German industry mass unemployment career difficulties and differences in wages and living standards The overwhelming difficulty resulting from reunification however is not persisting economic differences but the internal cultural divide between East and West Germans one based upon different moral values in the two Germanies The invisible wall that has replaced the previous highly visible territorial division of the German nation is rooted in issues of the past the Nazi past as well as the German Democratic Republic past In emphasizing economic differences the media and academics have avoided dealing with typically German cultural traits These include the psychological posture of West Germany which emphasized not differences between East and West but the break with Germany's Nazi past The adversarial posture of certain professional groups in East Germany towards the liberal and democratic values of West Germany have also been an obstacle Reviewing the problems accompanying reunification chapter 1 explores German culture and history and the moral lessons evolved from the Nazi past Chapter 2 focuses on the East West mindset and how differences in attitude affect efforts to adapt to reunification Chapter 3 discusses the simulated break with Nazi Germany in the German Democratic Republic Chapters 4 5 and 6 analyze the roots of the adversary posture of the professional groups in East Germany towards the values of the Berlin Republic Chapter 7 demonstrates the strong presence of inherited typically German cultural traits among East Germans such as a lack of individualism suspicion of strangers and obedience to authority Chapter 8 documents the extent to which a right wing extremist culture has remained latent in Eastern Germany Chapter 9 documents the extent to which moral reasoning in the GDR relieves the individual of any kind of responsibility for the actions of the state reproducing the way ordinary Germans rationalized their participation in the Nazi regime immediately after World War II Chapter 10 concludes with an overview of the historical and sociological factors revolving around the discussion of Nazi Germany the GDR and inner unification This volume will be important for historians political scientists anthropologists sociologists and a general public interested in Germany's reunification

How Happy to Call Oneself a Turk Gavin D. Brockett, 2011-05-01 The modern nation state of Turkey was established in 1923 but when and how did its citizens begin to

identify themselves as Turks Mustafa Kemal Atatürk Turkey's founding president is almost universally credited with creating a Turkish national identity through his revolutionary program to secularize the former heartland of the Ottoman Empire Yet despite Turkey's status as the lone secular state in the Muslim Middle East religion remains a powerful force in Turkish society and the country today is governed by a democratically elected political party with a distinctly religious Islamist orientation In this history Gavin D Brockett takes a fresh look at the formation of Turkish national identity focusing on the relationship between Islam and nationalism and the process through which a religious national identity emerged Challenging the orthodoxy that Atatürk and the political elite imposed a sense of national identity from the top down Brockett examines the social and political debates in provincial newspapers from around the country He shows that the unprecedented expansion of print media in Turkey between 1945 and 1954 which followed the end of strict single party authoritarian government created a forum in which ordinary people could inject popular religious identities into the new Turkish nationalism Brockett makes a convincing case that it was this fruitful negotiation between secular nationalism and Islam rather than the imposition of secularism alone that created the modern Turkish national identity **Religion and Space**

Lily Kong, Orlando Woods, 2016-02-11 This is the first study to bring space into conversation with religious competition conflict and violence in the contemporary world Lily Kong and Orlando Woods argue that because space is both a medium and an outcome of religious activity it is integral to understanding processes of religious competition conflict and violence The book explores how religious groups make claims to both religious and secular spaces and examines how such claims are managed negotiated and contested by the state and by other secular and religious agencies It also examines how globalisation has given rise to new forms of religious competition and how religious groups strengthen themselves through the development of social resilience as well as contribute to resilient societies Throughout the book case studies from around the world are used to examine how religious competition and conflict intersect with space The case studies include topical issues such as competing claims to the Temple Mount Haram el Sharif in Jerusalem opposition to the Ground Zero mosque in New York City and the regulation of religious conversion in India and Sri Lanka By helping readers develop new perspectives on how religion works in and through space **Religion and Space Competition Conflict and Violence in the Contemporary World** is an innovative contribution to the study of religion **A Postcard View of Hell: One Doughboy's Souvenir Album of the First World War**

Trustworthy Men Ian Forrest, 2020-03-31 The medieval church was founded on and governed by concepts of faith and trust but not in the way that is popularly assumed Offering a radical new interpretation of the institutional church and its social consequences in England Ian Forrest argues that between 1200 and 1500 the ability of bishops to govern depended on the cooperation of local people known as trustworthy men and shows how the combination of inequality and faith helped make the medieval church Trustworthy men in Latin *virī fidedigni* were jurors informants and witnesses who represented their parishes when bishops needed local knowledge or reliable collaborators Their importance in church courts at inquests and during visitations grew enormously between the thirteenth and fifteenth centuries The church had to trust these men and this trust rested on the complex and deep rooted cultures of faith that underpinned promises and obligations personal reputation and identity and belief in God But trust also had a dark side For the church to discriminate between the trustworthy and untrustworthy was not to identify the most honest Christians but to find people whose status ensured their word would not be contradicted This meant men rather than women and usually the wealthier tenants and property holders in each parish *Trustworthy Men* illustrates the ways in which the English church relied on and deepened inequalities within late medieval society and how trust and faith were manipulated for political ends
