**Walther Pistols** John Walter,2022-04-28 While the PP and PPK were intended for police work the Walther P 38 was produced for the Germany military all three pistols have garnered a formidable international reputation since the 1930s The innovative Walther PP Polizeipistole a double action semi automatic pistol intended for the law enforcement market became available in 1929 and went on to arm the police of several European countries in the 1930s Its smaller cousin the PPK more readily concealed for undercover work but with reduced magazine capacity was produced from 1931 Intended to replace the P 08 Luger the Walther P 38 was issued from 1940 and equipped the armed forces of Germany and other countries during and after World War II but never entirely replaced the Luger in German service All three pistols went on to have lengthy and varied service across the world after 1945 Both the PP and the PPK remain in production today while the P 38 re emerged as the P1 and equipped West German forces from 1963 until 2004 when it was replaced by the P8 In this study noted authority John Walter assesses the origins development use and legacy of these three high profile semi automatic pistols alongside other Walther variants such as the tiny 25 ACP Modell 9

**International Perspectives on Knowledge Integration** Thomas Lehmann,2020-05-18 Interest in knowledge integration grew considerably in recent years particularly within the realm of pre service teacher education However studies on the topic conceptualize knowledge integration in diverse ways For example it may be conceived as a specific coherence building learning process which involves not only acquiring but interrelating knowledge of different types e g theoretical and practical or from different domains which together constitute a teacher s or educational specialist s professional knowledge base e g content knowledge pedagogical knowledge pedagogical content knowledge knowledge about using technologies for learning and instruction etc Furthermore knowledge integration also refers to the meaningful application of knowledge of different types and from various domains in order to act professionally and to teach successfully In many countries however future teachers and educational specialists often struggle with knowledge integration because the task of integrating knowledge across domains from various courses and from practical training is left largely to the individuals Thus the efficacy and quality of higher education programs particularly in pre service teacher education could be improved through careful attention to knowledge integration International Perspectives on Knowledge Integration aims at facilitating the consideration of knowledge integration in teacher training and higher education in both research and practice Specifically it explores theoretical conceptions and methods and reports on original research and good practices for fostering knowledge integration It is thus of interest to researchers faculty board members and lecturers concerned with teacher training and higher education as well as to student teachers and students of pedagogy education and educational psychology
