Ozuru,Julius Akaba,Patience Rambe,Edem Korku Agbobli,Henri-Vincent Ndjave-Ndjoy,Regis Muchemwa,Andre de la Harpe,Konosoang Mpiti,Ayodeji Afolayan,2016-12-31 Cape Town South Africa 7 Sept 2016 8 Sept 2016 Theme Sustainable economies in the information economy Purpose To share the quality academic papers presented at the International Conference on Business and Management Dynamics ICBMD held from 7 to 8 September 2016 at African Pride Crystal Hotel and Spa in Cape Town As grey literature the proceedings are the contributions made by researchers at the conference and are considered the written record of the work that was presented to fellow conference delegates Methodology The methodology used varies from researcher to researcher but are suitable for the studies conducted Thus on the one hand studies that were subjective in nature used the interpretive paradigm where the qualitative approach adopted made use of the interview method to collect data On the other hand studies that were objectively inclined adopted the positivist philosophy and used survey questionnaires to collect data However there were some academic papers which used mixed methodology because of the nature of the study Whatever methodology used adhered to the ethos of the philosophies underpinning the methodology Contribution made to scholarship The articles come from individual researchers and each article in the proceedings is unique Mostly there is no general argument leading from one contribution to the next However it is interesting to note that in the area of economic performance it was evident that real exchange rate and net foreign direct investment contribute more towards innovations in economic growth With regard to human capital development papers presented evidence that there

exists a definite need to explore the phenomenon of personal branding as limited scientific academic research has been done within the field of personal branding or on elements of the topic Thus the outcome argues that personal branding has an influence on leadership style which in turn impacts on organisational performance and related hygiene factors Furthermore it was demonstrated that current methods or strategies for enforcing institutionalisation of knowledge sharing within an organisation have not been successful and as such new strategies are needed to reinforce efforts to nurture and invigorate the institutionalisation of knowledge sharing within an organisation With regard to technology and big data impact on organisational performance it was evident that system performance memory consumption and CPU utilisation can be used as criteria to compare and evaluate big data technologies to improve organisational performance Most of the articles contribution reemphasised technology education and training as a means of digitising business and improving effectiveness Target audience The target readership is academic researchers and business leaders who require access to the latest developments in the fields of economics information management business education development studies social sciences and technology It is also for policymakers and other stakeholders who need a better understanding of the impact of new developments on existing policies and regulations for their review or amendment

Diet for a Large Planet Chris Otter, 2020-10-12 A history of the unsustainable modern diet heavy in meat wheat and sugar that requires more land and resources than the planet is able to support We are facing a world food crisis of unparalleled proportions Our reliance on unsustainable dietary choices and agricultural systems is causing problems both for human health and the health of our planet Solutions from lab grown food to vegan diets to strictly local food consumption are often discussed but a central question remains how did we get to this point In Diet for a Large Planet Chris Otter goes back to the late eighteenth century in Britain where the diet heavy in meat wheat and sugar was developing As Britain underwent steady growth urbanization industrialization and economic expansion the nation altered its food choices shifting away from locally produced plant based nutrition This new diet rich in animal proteins and refined carbohydrates made people taller and stronger but it led to new types of health problems Its production also relied on far greater acreage than Britain itself forcing the nation to become more dependent on global resources Otter shows how this issue expands beyond Britain looking at the global effects of large agro food systems that require more resources than our planet can sustain This comprehensive history helps us understand how the British played a significant role in making red meat white bread and sugar the diet of choice linked to wealth luxury and power and shows how dietary choices connect to the pressing issues of climate change and food supply
