or English language arts with a focus on grades 4-8. Teachers in these subject areas however constitute less than thirty percent of the teacher workforce in a district. Comparatively little has been written about the measurement of achievement in the other grades and subjects. This volume seeks to remedy this imbalance by focusing on the assessment of student achievement in a broad range of grade levels and subject areas with particular attention to their use in the evaluation of teachers and schools in all. It addresses traditional end of course tests as well as alternative measures such as portfolios, exhibitions and student learning objectives. In each case issues related to design and development, psychometric considerations and validity challenges are covered from both a generic and a content specific perspective. The NCME Applications of Educational Measurement and Assessment series includes edited volumes designed to inform research based applications of educational measurement and assessment. Edited by leading experts, these books are comprehensive and practical resources on the latest developments in the field. Advancing Human Assessment Randy E. Bennett, Matthias von Davier, 2017-10-17. This book is open access under a CC BY-NC 2.5 license. This book describes the extensive contributions made toward the advancement of human assessment by scientists from one of the world's leading research institutions, Educational Testing Service. The book's four major sections detail research and development in measurement and statistics, education policy analysis and evaluation, scientific psychology and validity. Many of the developments presented have become de facto standards in educational and psychological measurement including in item response theory (IRT), linking and equating, differential item functioning (DIF) and educational surveys like the National Assessment of Educational Progress (NAEP), the Programme of International Student Assessment (PISA), the Progress of International Reading Literacy Study (PIRLS) and the Trends in Mathematics and Science Study (TIMSS). In addition to its comprehensive coverage of contributions to the theory and methodology of educational and psychological measurement and statistics, the book gives significant attention to ETS work in cognitive, personality, developmental and social psychology and to education policy analysis and program evaluation. The chapter authors are long standing experts who provide broad coverage and thoughtful insights that build upon decades of experience in research and best practices for measurement, evaluation, scientific psychology and education policy analysis. Opening with a chapter on the genesis of ETS and closing with a synthesis of the enormously diverse set of contributions made over its 70 year history, the book is a useful resource for all interested in the improvement of human assessment.

Report on the Iban Derek Freedman, 2021-01-07. The Iban or the Sea Dayaks of Sarawak have probably been the best known of the indigenous peoples of Borneo for well over a century. Much has been written about them but until the results of Dr. Freeman's field research were published by the Government of Sarawak and by Her Majesty's Stationery Office in 1955, there was little information on their methods of agriculture and their social system. The book has become a landmark in the studies of shifting cultivation and of cognatic

kinship organization and the ideas around which it is written have proved over the years to be a continuing and powerful stimulus in the development of kinship theory The field work on which the account is based was undertaken from 1949 to 1951 Although fundamental changes have taken place in the life of the Iban since the book was first published it has been decided to republish it substantially unaltered *Encyclopedia of African-American Education* Charles A.
