as future faculty members or professionals As more and more students attend graduate programs many higher education institutions have established professional development programs to help graduate students learn the wide range of skills needed to be successful as both students and as future professionals or academics To presuppose that graduate students are proficient library users is a mistake Graduate students need and want help and many libraries are now offering specialized services for this diverse population Contributors to this edited volume provide case studies and practical advice on academic library services for graduate students that support their multiple roles on campus and address the complex social and emotional issues related to their other roles as parents working adults caretakers and more As academic libraries shift from functioning primarily as collections repositories to collaborating as key players in discovery and knowledge creation value added services for graduate students are even more central to libraries changing missions This book makes an important contribution to the ongoing professional conversation and is a useful tool for librarians who want to better support graduate students at their institutions
