The Prisoner's Release Keith Soothill, 2023-10-25 For well over one hundred years society had considered ways of helping prisoners on their release from prison but there had been no serious attempt to assess in a scientific manner the value of such efforts Originally published in 1974 this book broke with this tradition and was the first full scale work published in this country evaluating carefully whether an active policy of finding suitable employment for men immediately on their release from prison had beneficial results The first part of the book discusses the historical development of prison after care from its early origins in the nineteenth century and indicates how up to the Second World War the primary object of after care had been regarded as the reinstatement of the ex prisoners in employment Gradually the specific task of finding jobs for ex prisoners had become a peripheral activity considered as the responsibility of the Department of Employment The effectiveness of the Department's pre release procedure for prisoners is discussed The rest of the book considers the fascinating Apex project set up to examine the effectiveness of finding work for ex prisoners The work of Apex continued to develop and expand but the present study considers the first five years when over four hundred men were randomly selected from two London prisons and offered the services of a specialist employment agency The outcome for these men is compared with a control group of over three hundred men randomly selected from the same prisons This study is concerned with the general run of the prison population and interestingly shows how some prisoners accept and others reject the offer of an employment service It further indicates the enormous efforts sometimes needed to find suitable employment for prisoners on release The outcome of the job interviews arranged in terms of the proportions attending the interviews starting the jobs and the length of time men stayed in the jobs arranged is vital reading for anyone involved in after care An important part of the work is the examination of the subsequent reconviction rates for the various groups of offenders and the implication that it seems possible to predict men who are unlikely to be helped by the simple provision of employment on release The final chapter considers critically some of the assumptions upon which the Apex project was based and the possible use of computer techniques in the individualization of treatment is briefly discussed The author was particularly well qualified to discuss this subject for apart from his work over a number of years with several after care organizations the present project involved working in prisons for over three years as well as interviewing and talking to men after their release The findings of this study will interest the wide variety of people concerned with prison after care Criminologists sociologists probation officers and all others working in prisons and after care will recognize the important implications of the material presented in this book

Class Andrew Milner, 1999-07-15 This concise and accessible textbook overviews the place and continuing centrality of the concept of class in cultural studies and sociology The book reopens the debates over class and culture that were very nearly closed down in postmodernism Andrew Milner offers readers a critical introduction to the Marxist and Weberian accounts of class and relates the significance of class in the new social movements He also looks at class politics

web wind speed forecasting for the specified heights using rnn lstm and gru ii the proposed computational models based on ai by supervised machine learning elucidate the wind speed behavior and allow accurate wind speed prediction at different anemometric heights e g 10 0 m 25 70 m 81 80 m and 101 80 m

learning based short term wind speed forecasting models for - Aug 28 2022

web sep 1 2023 based on historical study learning models are classified into two subclasses e g classical machine learning and advanced machine learning as shown in table 3 ordinary least square regression models deep learning and ensemble learning models have supervised learning models

supervised machine learning in wind forecasting and ramp event - Jul 07 2023

web supervised machine learning in wind forecasting and ramp event prediction provides an up to date overview on the broad area of wind generation and forecasting with a focus on the role and need of machine learning in this emerging field of knowledge

supervised machine learning in wind forecasting and ramp - Oct 10 2023

web supervised machine learning in wind forecasting and ramp event prediction provides an up to date overview on the broad area of wind generation and forecasting with a focus on the role and need of machine learning in this emerging field of knowledge various regression models and signal decomposition techniques are presented and

jmse free full text machine learning based approach to wind - Mar 23 2022

web nov 4 2023 as wind energy continues to be a crucial part of sustainable power generation the need for precise and efficient modeling of wind turbines especially under yawed conditions becomes increasingly significant addressing this the current study introduces a machine learning based symbolic regression approach for elucidating

data augmented sequential deep learning for wind power forecasting - Jan 01 2023

web nov 15 2021 this paper initially scrutinizes the usefulness of data augmentation approaches in wind power forecasting and proposes a multi input and multi output prediction algorithm with verified superiority inferences on the results of multistep forecasting five wind turbines with various topologies conclusions are given as follows

supervised machine learning in wind forecasting and ramp - Sep 09 2023

web jan 20 2020 supervised machine learning in wind forecasting and ramp event prediction provides an up to date overview of the broad area of wind generation and forecasting with a focus on the role and

supervised machine learning in wind forecasting and ramp - Jun 06 2023

web description supervised machine learning in wind forecasting and ramp event prediction provides an up to date overview on the broad area of wind generation and forecasting with a focus on the role and need of machine

supervised machine learning in wind forecasting and ramp - May 05 2023

web jan 21 2020 description supervised machine learning in wind forecasting and ramp event prediction provides an up to date overview on the broad area of wind generation and forecasting with a focus on the role and need of machine learning in this emerging field of knowledge

supervised machine learning in wind forecasting and ramp - Nov 30 2022

web jan 21 2020 supervised machine learning in wind forecasting and ramp event prediction provides an up to date overview on the broad area of wind generation and forecasting with a focus on the role and need of machine learning in this emerging field of knowledge various regression models and signal decomposition techniques are

supervised machine learning in wind forecasting and ramp - Aug 08 2023

web supervised machine learning in wind forecasting and ramp event prediction provides an up to date overview on the broad area of wind generation and forecasting with a focus on the
