

The nickel-plated covers on the '57 Classic humbuckers will tarnish with age. Some people don't like that, so do be aware

We doubt any player will feel too short-changed, though, not least because so many of us simply prefer an older-style nitro-cellulose finish and really aren't bothered by any minor imperfections. A guitar is made to be played, right?

Powering is pretty standard with dual '57 Classic humbuckers under shiny nickel-plated covers that match the Nashville-style tune-o-matic bridge and stud tailpiece. The strap buttons are typically small Gibson fare and the output jack is mounted on a perfectly robust, chromed metal square plate.

## Pickup differences

Often overlooked in favour of intro-fit brands Gibson's humbuckers, loaded on the majority of the company's guitars, are quite simply some of the most recognisable-sounding out there. Based primarily on Gibson's classic 'A'As there are three categories of vintage humbuckers: '57 Classics (as fitted to the Traditional), BurstBuckers and BurstBucker Pros as loaded on the 2008 Standard.

The '57 Classic and the slightly hotter BurstBucker (typically used in bridge position) use Alnico II magnets and vintage-style construction, but, unlike most original PAFs, the two coils are wax-potted to reduce high-frequency noise and microphonicity.

## 2008 Standard

If the Traditional is, by design, backward-looking, the new 2008 Standard looks forward with numerous changes that would seem to be aimed at being in line with, most obviously, more modern brands like PRS and ESP. Whether it's the advertised chambering of this model or simply slightly lighter mahogany, or both, the 2008 is a little lighter and seems a little more alive as you tap your knuckles on its body. Overall construction is very similar, although here the body back is one-piece and the maple top slightly less figured. Without

the coils are matched in terms of wind, output, generally believed to impart a smoother response. In terms of output, again they're pretty much in the vintage area – ours measured 7.95k ohms (bridge), 6.4k ohms (neck).

BurstBucker Pros (typically a 1.1 at neck and 2.2 at bridge) differ, with mismatched coils that can mean original PAFs which technically reduces the hum-canceling performance and is generally believed to result in a bit of the more 'edge' or bite to tone. The coils are wax-potted but the pickups both use stronger Alnico V magnets, which Gibson believes add 'ring and punch'. DC resistance of our samples measured 7.83k ohms (bridge), 7.05k ohms (neck).

## The 2008 sounds livelier and a little more dynamic compared to the Traditional's almost compressed voice

the pickguard it also looks a little leaner and less busy. Again the 'board and inlays seem dry and dirty but, if anything, the frets have a lighter, better, more rounded profile. Set-up is again equally good; the guitar arrived with a 'Flick'd' sticker on the bridge pickup including the nut, although we suspect opinion might be split on or the tuners – one of the numerous changes to the 'standard' formula that we see here. These are Grover locking types with chromed tulip buttons, not the more classic plastic of the traditional's Klussons. The lock is achieved very easily with a large rear thumbwheel, which clamps the strings in its gear hole. Take the tuners, the tune-o-matic and stud tailpiece lock to their posts. They are TonePros parts and, while the claim of increased sustain may be hard to confirm, they certainly won't fall off when you take all the strings off.

Compared to the Traditional the main changes here are in the neck shape and the electronics. Gibson advertises an 'asymmetrical' neck profile that's quite rare, especially on production electrics – the only other one that sticks in the mind is the profile used on the original Music Man Eddie Van Halen signature. Here the bass side is more 'D' shaped and the treble

2008: Gold-plated pots and locking jack

side is more of a 'C' with a shallower shoulder. Treble height less deep (20.5mm at the first fret, 22.73 at the 12th) than the Traditional that, while similar at the first (21.28mm), fills out to 25.5mm by the 12th.

Pickups move to the BurstBucker Pro 1 at neck and BurstBucker Pro 2 at the bridge and Borneo gold-plated pots visible through a smoked translucent control cover, also different is the Neutrik locking output jack tidily inset into the guitar's rim. Remove the electronics backplate and things all look rather high tech: the four square pots are soldered onto a Gibson logo'd PCB; the pickups connect to the PCB with clearly marked solder-less push-in connects. Likewise the outputs to the toggle switch.

## Sounds

Rarely do even two identical guitars end up sounding identical, but where we have differences in construction and electronics, as here, these two Les Pauls sound really very different. The Traditional should be familiar to any reader who's owned a standard production Les Paul over the past couple of decades. The combination of the two '57 Classics and the standard Gibson
