

The background of the cover is a photograph of a coastal landscape. In the foreground, a stack of several large, flat, brownish-grey rocks is balanced on a grassy hill. In the background, a blue body of water meets a bright blue sky filled with wispy white clouds. A faint rainbow is visible in the sky, arching over the water.

John Steckley's familiarity with and respect for the epistemology of the Huron Mohawk and Ojibwa peoples enlightens and enables his research. In this book he provides a critical framework for assessing Aboriginal content in introductory sociology textbooks. He defines what is missing from the seventy seven texts included in his study of the manifestation of cultural hegemony in Canadian sociology textbooks. This critique is suitable for students and professors of sociology as Dr Steckley addresses the impact of the ellipses from the textbooks they have traditionally used. Is it possible to design a forest policy that satisfies ethical and environmental concerns and is acceptable to business, labour and First Nations representatives? What is the best path through the tangle of ethical issues surrounding the collapse of the east coast fishery? What sort of obligations does a rich nation such as Canada have to satisfy the claims of global environmental justice? These are the sorts of issues in applied ethics that are tackled in this collection of essays, the vast majority of which have been written especially for this volume. It is the first Canadian collection of its kind. The book is divided into sections detailing such topics as the environment and the economy, ethical issues relating to non human animals, issues of gender and issues relating to native peoples. Most of the authors are philosophers though specialists in geography, geology and the social sciences are also among the contributors. Frequent reference is made to theoretical ethical concerns but the focus throughout is on applied ethics and a variety of case studies are included. Examples include essays on animal rights and the case of native hunters, surface mining in Northern Ontario, the Quebec arctic and fishing communities in the Maritimes. Comparisons are frequently drawn to policies and ethical questions arising in other countries, most prominently the United States. Bilateral Ecopolitics Philippe Le Prestre, Peter Stoett, 2017-05-15. The context in which environmental policy decision making occurs has changed, resulting from widening environmental problems.

increased demands from groups and citizens continuing pressure on the continent's resources and normative shifts. The complexity of current issues is related to an even broader contextual shift: the globalization of environmental issues exacerbated by trade liberalization especially on a regional level and the potential contradictions between trade and the environmental international agenda that this implies. This volume studies the new dimensions of resource conflict between Canada and the United States accounting for the emergence of new bilateral environmental issues and detailing how trade liberalization has fostered both disputes and policy convergence. It also examines the recent shifts in America towards a unilateral foreign policy and how this affects active Canadian diplomacy. Ideal as a resource tool for students and academics, this book will be a key resource in the areas of global governance, US-Canadian foreign policy and environmental policy.

COUNCIL OF EUROPE PARLIAMENTARY ASSEMBLY FORTY THIRD ORDINARY SESSION (Second part) 18-25 September 1991 Official Report OF DEBATED VOLUME II Council of Europe, **Effective Risk Communication** Joseph Arvai, Louie Rivers III, 2013-10-30. There are two questions often asked of risk communication: what has been learned from past work and what is needed to push the field forward. Drawing on the experience of leading risk researchers and practitioners, *Effective Risk Communication* focuses on answering these questions. The book draws together new examples of research and practice from contexts as diverse as energy generation, human health, nuclear waste, climate change, food choice and social media. This book treats risk communication as much more than the interchange of risk information between experts and non-experts; rather, it aims to emphasise the diversity in viewpoints and practices. In each specially commissioned chapter, the authors reflect on the theoretical and applied underpinnings of their best projects and comment on how their approach could be used effectively by others. Building upon each other, the chapters will provoke new discussion and action around a discipline which many feel is neither meeting important needs in practice nor living up to its potential in research. Through a more careful examination of the work already done in risk communication, the book will help develop better, more reflective practice for the future. *The Canadian Environmental Education Catalogue* Pembina Institute for Appropriate Development, 1995. An annotated guide to environmental education materials. **Exploring Political Ecology** Alexander M. Ervin, 2024-08-30. This book explores some of the conditions and underlying causes of the multiple environmental crises facing humanity. Rooted in anthropology but multidisciplinary in scope, it surveys the many socio-cultural and socio-economic errors, foibles and follies that brought us to these circumstances. Crucially and uniquely, it outlines an array of viable and practical solutions, some of which are radically different from the current status quo and cultural expectations. The first chapter canvasses the emerging interdisciplinary field of political ecology; then Part I examines details and trends in agriculture. Part II portrays the threats posed by carbon-dependent and combustive technologies as well as the hydro and nuclear energy systems now powering the majority of human actions in developed parts of the world and expanding beyond. The third part turns to consider solutions including green new deals, de-growth policies, localization, agroecology, alternative

energy systems and many more possibilities The conclusions engage with urgent moral and legal issues and outline social movement strategies all related to our collective neglect of climate change and then finally speculate upon possible futures This book is key reading for researchers and students interested in climate change across the social and physical sciences and humanities Forensic Geoscience Kenneth Pye, Debra J. Croft, 2004 Forensic geoscience is an increasingly important sub discipline within geoscience and forensic science Although minerals soils dusts and rock fragments have been used as only begun to be recognized in the last ten years or so The police and other investigative bodies are keen to encourage such developments in the fight against crime particularly since many criminals show a high level of forensic awareness with regard to evidence such as fingerprints blood and other body fluids The papers in this volume illustrate some of the main principles techniques and applications in current forensic geoscience covering research and casework in the UK and internationally The techniques described range from macro scale field geophysical investigations to micro scale laboratory studies of the chemical and textural properties of individual particles In addition to forensic applications many of these techniques have broad utility in geological geomorphological soil science and archaeological research *International Books in Print* ,1997 Canadian Sport Marketing Norm O'Reilly, Benoit Seguin, Gashaw Abeza, Michael L.
