Origins Of The State And Civilization The Process Of Cultural Evolution:

Origins of the State and Civilization Elman Rogers Service, 1975 **Archaeology of the Origin of the State** Vicente Lull, Rafael Micó Pérez, 2011-06-30 A critically acute summary of the main theories about the State from Greek antiquity to the present The authors highlight the importance of archaeology to our knowledge of the formation and working of the first States and ask what state of social production led to the State arising as the self interested regulator of social relationships **Restructuring Europe** Stefano Bartolini, 2005-10-06 This book focuses on the historical configuration of the territorial borders and functional boundaries of the European nation state It presents integration as a process of boundary transcendence redefinition shift and change that fundamentally alters the nature of the European states Its core concern lies in the relationship between the specific institutional design of the new Brussels centre the boundary redefinitions that result from its political production and finally the consequences of these two elements on established and developing national European political structures Integration is examined as a new historical phase in the development of Europe characterized by a powerful trend toward legal economic and cultural de differentiation after the five century process of differentiation that led to the European system of nation states Considering the EU as the formation of an enlarged territorial system this work recovers some of the classic issues of political modernization theory Is the EU an attempt at state formation Is it an attempt at centre formation without nation building Is it a process of centre formation without democratization This work also seeks to sharpen the conceptual tools currently available to deal with processes of territorial enlargement and unification It develops a theoretical framework for political structuring beyond the nation state capable of linking all aspects of EU integration inter governmentalism definition of rights the constitutionalization of treaties the tensions between the new territorial hierarchy and the nation states etc The book adopts an holistic approach to integration in the form of a theory from which hypotheses can be generated even if it is not possible to test all of its components This theoretical framework has three principal aims to overcome a rigid distinction between domestic politics and international relations to link actors orientations interests and motivations with macro outcomes and to relate structural profiles with dynamic processes of change *A Comparative Study of Thirty City-state Cultures* Mogens Herman Hansen, 2000 **State formation and the structure of politics in Mamluk Syro-Egypt, 648-741 A.H./1250-1340 C.E.** Winslow Williams Clifford, 2013-02-19 Winslow Williams Clifford is one of the few historians so far who have addressed the history and culture of the so called Mamluk Sultanate 1250 1517 on the basis of theoretical models This volume is a posthumous publication of his doctoral thesis submitted in 1995 at the University of Chicago Through his skillful application of social theory Clifford succeeded in providing highly convincing evidence that the Mamluk Sultanate did not as was maintained for a long time constitute a static form of oriental despotism but was rather a highly differentiated society It was primarily based on compliance with a complex system of order that had established itself during the rule of the first sultans *The Precolonial State in West Africa* J.

Origins, Foundations, Sustainability and Trip Lines of Good Governance: Archaeological and Historical Considerations Gary M. Feinman,Richard Edward Blanton,Stephen A. Kowalewski,Lane Fargher Navarro,2022-10-05 Until recently scholarly consensus across the social sciences and history adhered to the view that the incorporation of citizen voice in governance e g democracy was an entirely Western phenomenon that mostly is a product of the emergence of rational thought and the modern world These views are now

empirically questioned and subject to serious reconsideration Yet even researchers who recognize a broader temporal span for democratic or good governance draw fundamental distinctions between these political forms in the past and present Building on the collective action theories in particular those focused on fiscal financing the editors of this Research Topic outline fundamental characteristics internal financing equitable taxation checks on power and a functioning bureaucracy at the core of good governance which are neither the sole project of the contemporary West nor tied to any specific ideological construct or form of leadership Even elections can no longer be conceived as assurance of good governance At this time of global challenges to democracy understanding the comparative history of good governments their core institutions how they worked their foundations what led to their downfalls and the factors that prompted their sustenance or their collapses are extremely important to document The historical trends and coactive processes that underpinned those human cooperative arrangements which fostered growth and general well being require comparative focus if we are to draw on the wealth of human history to help craft better governance in the future and forestall the tripwires that lead to its failures We welcome contributions which focus on Diachronic examinations of changes in the fiscal foundations of governance and their impacts on governance Comparative analysis of governmental variability and its relationship to collective action and its fiscal financing Cross temporal studies of shifts in the degree of good governance and relations to inequality sustainability bureaucracy public goods and services and fiscal financing The importance of social compacts and contracts in representative government and how these are sustained and break down Alternatives and supplements to elections as means of assessing subaltern voices The relationship between governance and inequality over time and across space Differences in modes of political collapse and their relationship to governance fiscal financing and responses of principals The role of public ritual in good versus autocratic governments Variance in communication and computation in good versus autocratic governments The relationship between comparative governance and the uses and spatial distributions of community urban space residential and non residential architecture sprawl versus compact settlement The relationship between comparative governance and neighborhood organization Was there one or many episodes of enlightenment The relationship between governance and coactive processes including considerations of demographic growth patterns of migration well being economic growth The relationship between slave labor and governance spot resources and governance Non hierarchical and egalitarian forms of governance in non state societies Indigenous inspirations and influences on the Constitution of the United States Collective action and establishment of early cities Our aim for this Research Topic is to compile a series of research essays drawn from a broad cross regional and cross temporal sample of historical settings to explore issues and themes relevant to the history and processes that have been at the heart of good governance

The Emergence of Israel in Ancient Palestine Emanuel Pfoh, 2016-04-01 Taking advantage of critical methodology for history writing and the use of anthropological insights and ethnographic data from the modern Middle East this study aims at providing new

understandings on the emergence of Israel in ancient Palestine and the socio political dynamics at work in the Levant during antiquity The book begins with a discussion of matters of historiography and history writing both in ancient and modern times and an evaluation on the incidence of the modern theological discourse in relation to history and history writing Chapter 2 evaluates the methodology used by biblical scholars for gaining knowledge on ancient Israelite society Pfoh argues that such attempts often apply socio scientific models on biblical narratives without external evidence of the reconstructed past producing a virtual past reality which cannot be confirmed concretely Chapter 3 deals with the archaeological remains usually held as clear evidence of Israelite statehood in the tenth century BCE The main criticism is directed towards archaeological interpretations of the data which are led by the biblical narratives of the books of Judges and Samuel resulting in a harmonic blend of ancient literature and modern anthropological models on state formation Chapter 4 continues with the discussion on how anthropological models should be employed for history writing Socio political concepts such as chiefdom society or state formation should not be imposed on the contents of ancient literary sources i e the Bible but used instead to analyse our primary sources the archaeological and epigraphic records in order to create a socio historical account The final chapter attempts to provide an historical explanation regarding the emergence of Israel in ancient Palestine without relying on the Bible but only on archaeology epigraphy and anthropological insights This Israel is not the biblical one This is the Israel from history the one that the modern historian aims at recovering from the study of ancient epigraphic and archaeological remains The arguments presented challenge the idea that the biblical writers were recording historical events as we understand this practice nowadays and that we can use the biblical records for creating critical histories of Israel in ancient Palestine It also questions the existence of undisputable traces of statehood in the archaeological record from the Iron Age as the biblical images about a United Monarchy might lead us to believe Thus drawing on ethnographic insights we may gain a better knowledge on how ancient Levantine societies functioned providing us with a context for understanding the emergence of historical Israel as a major highland patronate with a socio political life of almost two centuries It is during the later periods of ancient Palestines history the Persian and the Graeco Roman that we find the proper context into which biblical Israel is created beginning a literary life of more than two millennia
